

Yearly Services

On-Demand Home Services in Kathmandu

Prepared for: Sriyog Consulting

Prepared by: Sadikshya Karki

Date: June 2026

Research Scope: Kathmandu, Nepal

1. Introduction

This report presents an analysis of demand patterns across 40 home and lifestyle services based on monthly booking data collected over a full calendar year. The dataset covers services ranging from household maintenance and construction work to wellness treatments and technology installations. The purpose of this analysis is to identify which services experience peak demand, during which months that demand is highest, and how different service categories behave across seasons.

Each service in this study was assigned a monthly demand rating of High, Moderate, or Low. These ratings reflect booking volumes and customer activity observed throughout the year. The analysis is organized to address the following key questions:

- Which services are the most consistently in-demand throughout the year?
- Which months carry the highest overall service activity?
- How do different service categories behave across seasons?
- What seasonal patterns shape the demand calendar?

2. Monthly Demand Overview

The table below summarizes how many of the 40 services recorded High, Moderate, or Low demand in each month of the year. This gives a broad picture of which months are busiest overall and where demand is more evenly spread.

Table 1: Monthly distribution of High, Moderate, and Low demand across all 40 services

Month	High Demand (H)	Moderate Demand (M)	Low Demand (L)
January	7	18	15
February	8	19	13
March	7	33	0
April	21	18	1
May	23	12	5
June	13	24	3
July	11	24	5
August	9	24	7
September	10	29	1

October	17	22	1
November	17	18	5
December	14	16	10

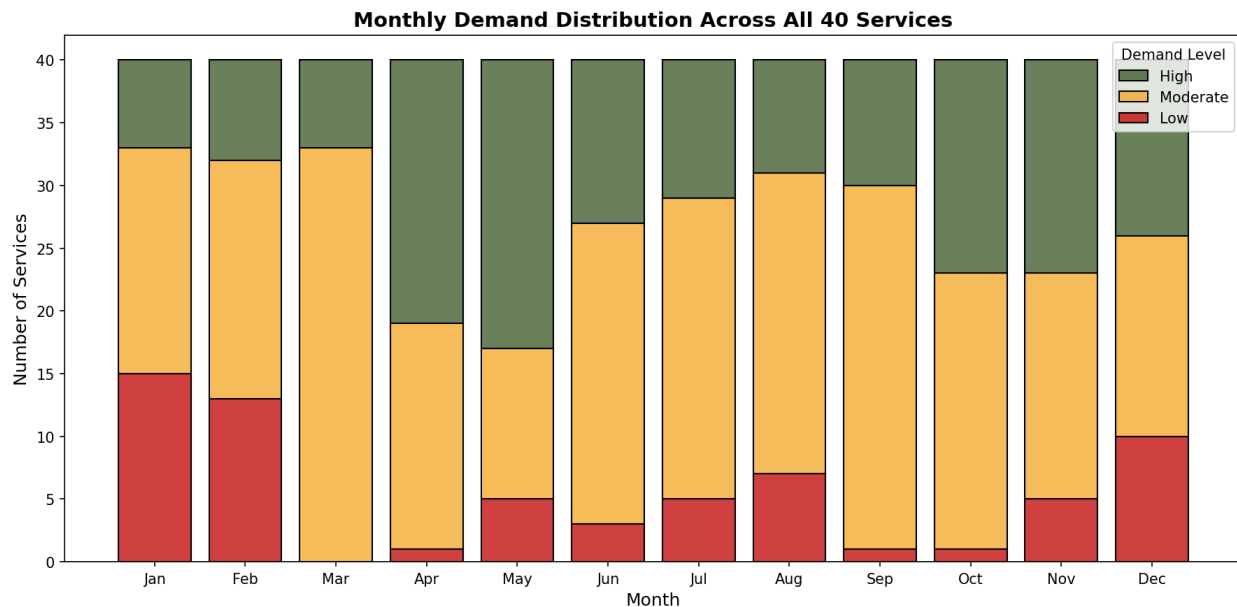

Figure 1: Monthly Demand Distribution Across All 40 Services

April and May stand out as the two busiest months of the year, with 29 and 23 services at High demand respectively. October and November are also strong, each recording 17 services at peak demand. Key observations from the monthly data include:

- April and May form the single most active window of the year, driven by pre-monsoon preparation across nearly all service categories.
- October and November represent a strong secondary peak tied to post-monsoon repairs and festive season preparations ahead of Dashain and Tihar.
- January and February record the lowest overall High demand count, but winter-specific services such as Geyser Repair, Chimney Repair, Spa at Home, and Massage Therapy see their highest activity during these months.
- March functions as a transitional month where most services settle at Moderate demand before the spring peak arrives.
- August marks the tail end of the monsoon, with construction and outdoor demand easing but repair and hygiene services remaining elevated.

3. Service-Level Demand Analysis

The table below presents all 40 services along with their category, the number of months in which they recorded High demand, and the specific months that form their peak season.

Table 2: Demand summary for all 40 services with peak season months

#	Service Name	Category	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Peak Season	Remarks
1	Deep Cleaning	Cleaning and Hygiene	M	M	H	H	M	M	M	M	M	H	H	H	Mar, Apr, Oct, Nov, Dec	Demand rises sharply before Dashain and Tihar when families deep clean their homes. Post-winter cleaning in March and pre-festival prep in October-December keep bookings consistently high.
2	Garden Care	Outdoor and Garden	L	L	M	H	H	M	M	M	H	M	L	L	Apr, May, Sep	Spring is when gardens come alive after winter, so people invest in care and landscaping in April-May. A second wave hits in September as gardens recover from the monsoon and need tidying before autumn.
3	Masonry Repair	Construction and Renovation	L	L	M	H	H	M	L	L	M	H	M	L	Apr, May, Oct	Before the monsoon arrives, homeowners rush to fix exterior walls and foundations to prevent water damage. After the rains, cracks and surface damage need repair, creating a strong October demand.
4	Plumbing Repair	Repair and Maintenance	M	M	M	M	M	H	H	H	M	M	M	M	Jun, Jul, Aug	The monsoon brings heavy rainfall that stresses pipes, causes blockages, and leads to drainage overflow. This is why plumbing calls spike from June through August every year.
5	Electrical Repair	Repair and Maintenance	M	M	M	M	M	M	M	M	M	M	H	H	Nov, Dec	As winter sets in, people install room heaters, geysers, and additional lighting for Tihar. November and December see the highest demand as households prepare for cold nights and festive celebrations.
6	Carpentry	Construction and Renovation	L	L	M	M	H	M	M	M	H	H	M	M	May, Sep, Oct	Carpentry work picks up in May when homeowners renovate before monsoon. After the rains, people resume furniture upgrades and interior work, creating a second strong season in September-October.

7	Washing Machine Repair	Repair and Maintenance	H	H	M	M	L	M	H	H	M	M	M	H	Jan, Feb, Jul, Aug, Dec	In winter, washing machines run multiple heavy cycles daily for thick clothes and blankets. The strain causes more breakdowns in January-February. Monsoon humidity in July-August also causes motor and electrical faults.
8	EV Charger Installation	Tech and Smart Home	M	M	M	M	H	H	H	H	M	M	M	M	May, Jun, Jul, Aug	EV adoption in Nepal is growing and peaks with summer purchases. People want chargers installed before monsoon limits outdoor electrical work, making May to August the busiest window.
9	AC Services	Repair and Maintenance	L	L	M	H	H	H	H	H	M	L	L	L	Apr, May, Jun, Jul, Aug	Summers in Nepal's Terai and valley regions get intensely hot. People service their ACs in April before temperatures peak, and units run non-stop from May to August, requiring frequent maintenance calls.
10	Painting	Construction and Renovation	L	L	M	H	H	M	L	L	M	H	H	M	Apr, May, Oct, Nov	Painting requires dry surfaces and low humidity, making pre-monsoon (April-May) and post-monsoon (October-November) the best times. Families also repaint homes ahead of Dashain and Tihar celebrations.
11	Packing and Moving	Cleaning and Hygiene	M	M	M	H	H	H	M	M	H	M	M	M	Apr, May, Jun, Sep	Government job postings and school admissions in Nepal cluster around April-June, pushing many families to relocate. September sees another wave of transfers before the new fiscal year cycle kicks in.
12	AirBnB Maintenance	Cleaning and Hygiene	M	M	M	H	H	H	H	H	M	M	M	M	Apr, May, Jun, Jul, Aug	Nepal's tourist season runs from spring through summer. Short-term rentals in Kathmandu need frequent maintenance during high occupancy months from April to August.
13	Bridal Makeup	Wellness and Beauty	M	H	H	H	H	M	M	M	H	H	M	M	Feb, Mar, Apr, May, Sep, Oct	Wedding dates in Nepal are set according to the Hindu calendar, with auspicious seasons falling in February-May and again in September-October. Bridal bookings

																follow these wedding seasons closely.
14	RO Water Purifying	Repair and Maintenance	M	M	H	H	H	H	H	H	M	M	M	M	Mar, Apr, May, Jun, Jul, Aug	Summer heat accelerates bacterial growth in water, making purification more urgent. During monsoon, water sources get contaminated, keeping RO servicing and filter replacements in high demand through August.
15	Refrigerator Repair	Repair and Maintenance	M	M	M	M	H	H	H	H	M	M	M	M	May, Jun, Jul, Aug	Refrigerators are pushed to their limits during Nepal's hot summer months. Compressors overheat and cooling efficiency drops, leading to a surge in repair calls from May to August.
16	CCTV Services	Tech and Smart Home	M	M	M	M	M	M	M	M	H	H	H	H	Sep, Oct, Nov, Dec	Households and businesses upgrade their CCTV systems ahead of the festive season when foot traffic increases. Year-end corporate security reviews also drive installations from September through December.
17	Modular Kitchen	Construction and Renovation	L	L	M	M	H	H	M	M	M	H	H	M	May, Jun, Oct, Nov	Modular kitchen projects are planned during dry months when construction work is comfortable. May-June and October-November align with renovation seasons and festival home upgrades.
18	Home Renovation	Construction and Renovation	L	L	M	H	H	M	L	L	M	H	H	M	Apr, May, Oct, Nov	Pre-monsoon is the ideal window for major renovation work before rain halts construction. Post-monsoon repairs are needed after structural damage, and festive season motivates cosmetic upgrades in October.
19	Pest Control	Cleaning and Hygiene	L	L	M	H	H	H	H	M	M	M	L	L	Apr, May, Jun, Jul	Monsoon warmth and standing water create perfect breeding conditions for insects and rodents. Pest control demand is at its peak from April through July, especially in the Terai region.
20	Drywall Repair	Construction and Renovation	L	M	M	H	H	M	M	M	H	H	M	L	Apr, May, Sep, Oct	Monsoon moisture seeps into walls and causes drywall to crack or peel. September and October are peak months for

																	post-rain repairs, while April-May sees pre-monsoon renovation work.
21	Salon at Home	Wellness and Beauty	M	H	H	M	M	M	M	M	M	M	H	H	Feb, Mar, Nov, Dec		Wedding season demand for home salon services is strong in February-March. November-December brings another wave as families prepare for Tihar, year-end parties, and winter social gatherings.
22	Tiling	Construction and Renovation	L	L	M	H	H	M	M	M	H	H	M	L	Apr, May, Sep, Oct		Tiling requires a dry and stable environment. Contractors and homeowners schedule tiling work in April-May before rains arrive and again in September-October after the monsoon clears.
23	Chef at Home	Wellness and Beauty	H	M	M	M	M	M	M	M	M	M	H	H	Jan, Nov, Dec		Home chefs are most in demand during New Year gatherings in January and the festive months of November-December when families host large meals for Tihar and year-end celebrations.
24	Home Automation	Tech and Smart Home	M	M	M	M	M	H	H	H	M	M	H	H	Jun, Jul, Aug, Nov, Dec		People invest in home automation during summer home improvement projects and again in November-December when smart heating, lighting, and security systems become priorities before winter.
25	Parquetting	Construction and Renovation	L	L	M	H	H	M	M	L	M	H	M	L	Apr, May, Oct		Parquet and hardwood flooring must be laid in dry conditions to prevent warping. April-May and October are the preferred windows, avoiding monsoon humidity entirely.
26	Indoor Planting	Outdoor and Garden	M	M	H	H	M	M	M	M	M	H	M	M	Mar, Apr, Oct		March-April is when people bring plants indoors ahead of harsh summer sun. October sees a festive surge as households decorate with greenery for Dashain and Tihar celebrations.
27	Spa at Home	Wellness and Beauty	H	H	M	M	L	L	M	M	M	M	H	H	Jan, Feb, Nov, Dec		Cold winters make in-home spa services very appealing in January-February. The festive months of November-December also drive bookings

																as people treat themselves after a busy year.
28	Physiotherapy	Wellness and Beauty	H	H	M	M	M	M	M	M	M	M	H	H	Jan, Feb, Nov, Dec	Cold weather stiffens joints and increases musculoskeletal complaints, making physiotherapy most needed in winter. Post-holiday physical strain in January also adds to demand at the start of the year.
29	Handyman	Repair and Maintenance	M	M	H	H	H	M	M	M	H	H	M	M	Mar, Apr, May, Sep, Oct	Before the monsoon, people fix loose fittings, leaky roofs, and worn surfaces to weatherproof their homes. After the rains, handyman services are needed again to address damage from the season.
30	Massage Therapy	Wellness and Beauty	H	H	M	M	L	M	M	M	M	M	H	H	Jan, Feb, Nov, Dec	People seek massage therapy most during cold winter months for relief from muscle stiffness and fatigue. November-December bookings rise as the festive season brings stress and long working hours.
31	Water Tank Cleaning	Cleaning and Hygiene	L	L	M	H	H	H	H	H	M	M	L	L	Apr, May, Jun, Jul, Aug	Tanks must be cleaned before monsoon to remove accumulated sediment and prevent contamination when rainwater mixes in. Demand stays high through August due to ongoing hygiene concerns.
32	Aluminum Fabrication	Construction and Renovation	L	M	M	H	H	M	M	M	H	H	M	L	Apr, May, Sep, Oct	Window frames, door frames, and balcony railings are fabricated and installed during dry pre-monsoon and post-monsoon seasons when outdoor work and curing are most reliable.
33	False Ceiling	Construction and Renovation	L	L	M	H	H	M	M	L	M	H	H	M	Apr, May, Oct, Nov	False ceiling installation is an indoor task but requires a dust-free, dry environment. It peaks during pre-monsoon renovations in April-May and post-monsoon finishing work in October-November.
34	Computer Repair	Tech and Smart Home	M	M	M	M	M	M	M	M	H	H	H	H	Sep, Oct, Nov, Dec	September marks the start of the academic year in Nepal, driving laptop and desktop repair demand. Year-end office upgrades and hardware

																	replacements push demand further through Q4.
35	Geyser Repair	Repair and Maintenance	H	H	M	L	L	L	L	L	L	M	H	H	Jan, Feb, Nov, Dec	Geysers sit unused through summer and often develop faults by the time cold weather returns. November-December and January-February are peak months as households switch them back on for daily use.	
36	Chimney Repair	Repair and Maintenance	H	H	M	M	L	L	L	L	M	M	H	H	Jan, Feb, Nov, Dec	Kitchen chimneys collect grease heavily during winter when windows are closed and cooking is more frequent. Servicing peaks in January-February and again in November when heavy cooking resumes.	
37	Tree Cutting and Pruning	Outdoor and Garden	L	L	M	M	H	H	M	M	M	M	L	L	May, Jun	Before monsoon winds and heavy rainfall arrive in May-June, tree trimming is essential to prevent branches from falling on homes and power lines. This makes it a safety-driven seasonal service.	
38	Septic Tank Cleaning	Cleaning and Hygiene	M	M	H	H	M	M	M	M	M	H	M	M	Mar, Apr, Oct	Septic tanks must be emptied before the monsoon to avoid overflow from excess groundwater. October sees another round of cleaning after the rainy season to clear any buildup.	
39	Pet Grooming	Wellness and Beauty	M	M	M	H	H	H	H	M	M	M	M	M	Apr, May, Jun, Jul	Warmer months cause pets to shed heavily and spend more time outdoors, increasing grooming frequency. April through July is when pet owners book grooming most consistently.	
40	Lift and Elevator Repair	Repair and Maintenance	M	M	M	M	M	M	M	M	M	M	H	H	Nov, Dec	Lifts and elevators undergo annual maintenance checks at year-end. November-December also sees more intensive use in commercial buildings during the festive season, leading to more service calls.	

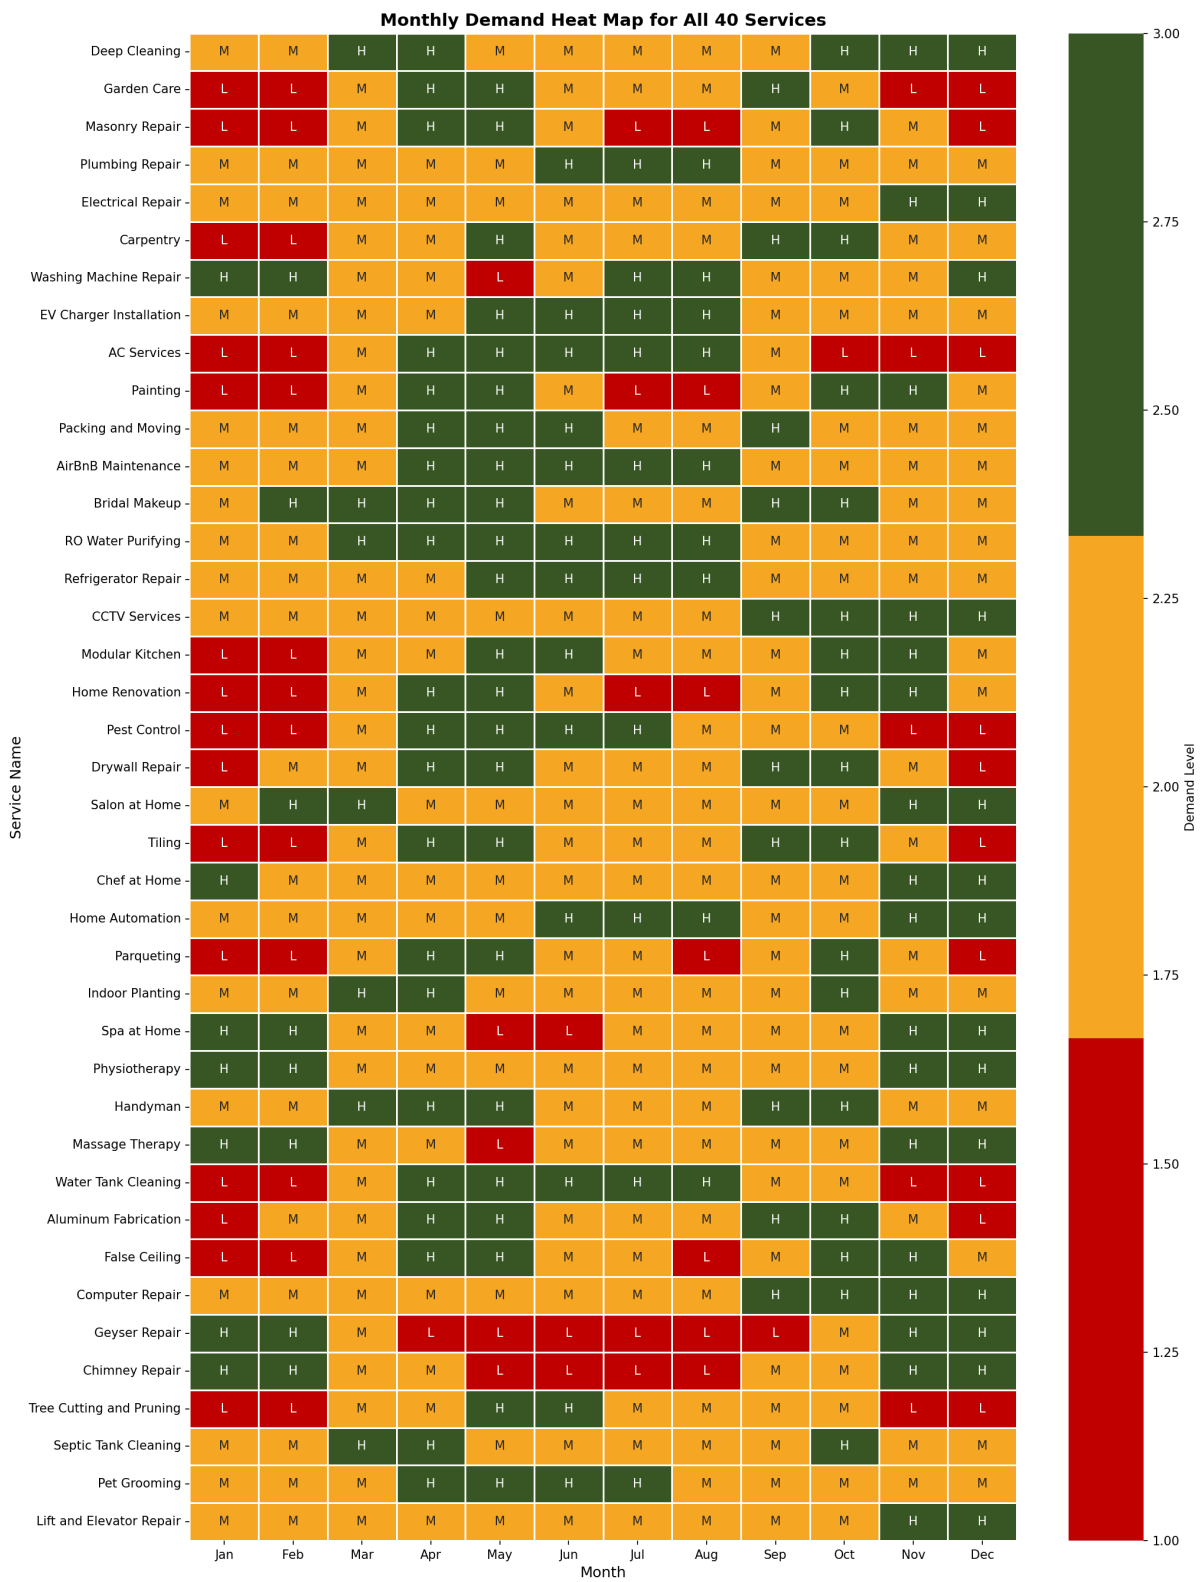

Figure 2: Monthly Demand Heat Map for All 40 Services

The findings from service-level data can be summarized across 3 tiers of demand intensity.

Highest Demand Services: 6 Peak Months

Two services recorded High demand in 6 months of the year, making them the most consistently active in the entire dataset:

- Bridal Makeup peaks during auspicious wedding seasons defined by the Hindu calendar, running from February through May and again in September and October.
- RO Water Purifying stays in high demand from March through August, driven by summer heat that accelerates bacterial growth and monsoon contamination of water sources.

High Demand Services: 5 Peak Months

Seven services maintained High demand across 5 months of the year:

- Deep Cleaning is active from March through April and again from October through December, driven by pre-monsoon cleaning and festival preparations.
- AC Services peaks from April through August as summer temperatures in Nepal's Terai and valley regions push units to run continuously.
- AirBnB Maintenance follows Nepal's tourism season and remains in peak demand from April through August.
- Washing Machine Repair peaks in winter, when heavy fabrics create extra load, and in the monsoon months of July and August when humidity causes electrical faults.
- Handyman peaks across five months spanning the pre-monsoon window in March through May and the post-monsoon recovery in September and October.
- Water Tank Cleaning demand is highest from April to August, driven by pre-monsoon cleaning and increased contamination risks during the monsoon.
- Home Automation peaks during summer home improvement months and again in November and December when smart heating and security systems become priorities.

Moderate-High Demand Services: 4 Peak Months

The largest group of services falls into the four-peak-month tier. These include:

- Construction services such as Painting, Home Renovation, Tiling, Drywall Repair, False Ceiling, Aluminum Fabrication, and Modular Kitchen, which cluster their peaks around the two dry windows of April through May and October through November.
- Repair services such as Refrigerator Repair, Geyser Repair, Chimney Repair, and CCTV Services, each aligned with the season when their respective appliances are most heavily used.
- Wellness services including Spa at Home, Physiotherapy, Massage Therapy, and Salon at Home, which peak in winter months and around wedding and festive seasons.
- Tech services including EV Charger Installation, CCTV Services, and Computer Repair, which are driven by tourism season, academic year starts, and year-end corporate activity.

Narrowly Seasonal Services: 2 to 3 Peak Months

Several services have a tightly defined demand window:

- Electrical Repair and Lift and Elevator Repair both peak only in November and December, tied to festive season usage and year-end maintenance schedules.
- Tree Cutting and Pruning peaks only in May and June as a safety-driven service before monsoon winds pose a risk to branches and power lines.
- Garden Care, Masonry Repair, Carpentry, Plumbing Repair, Parquetting, and Septic Tank Cleaning all follow narrow seasonal windows tied directly to monsoon timing.

4. Category-Level Analysis

The 40 services are distributed across 6 broad categories. The table below summarizes how each category performs in terms of the number of services it contains, the average number of peak months, and the general active season.

Table 3: Average demand intensity and active season by service category

Category	No. of Services	Avg. Peak Months	Active Season
Cleaning and Hygiene	6	4.3	Pre-monsoon and monsoon period
Construction and Renovation	13	3.7	Pre and post monsoon

Outdoor and Garden	3	2.7	Spring and pre-monsoon
Repair and Maintenance	11	4.0	Monsoon and winter
Tech and Smart Home	4	4.2	Summer and year-end
Wellness and Beauty	8	4.1	Wedding season and winter

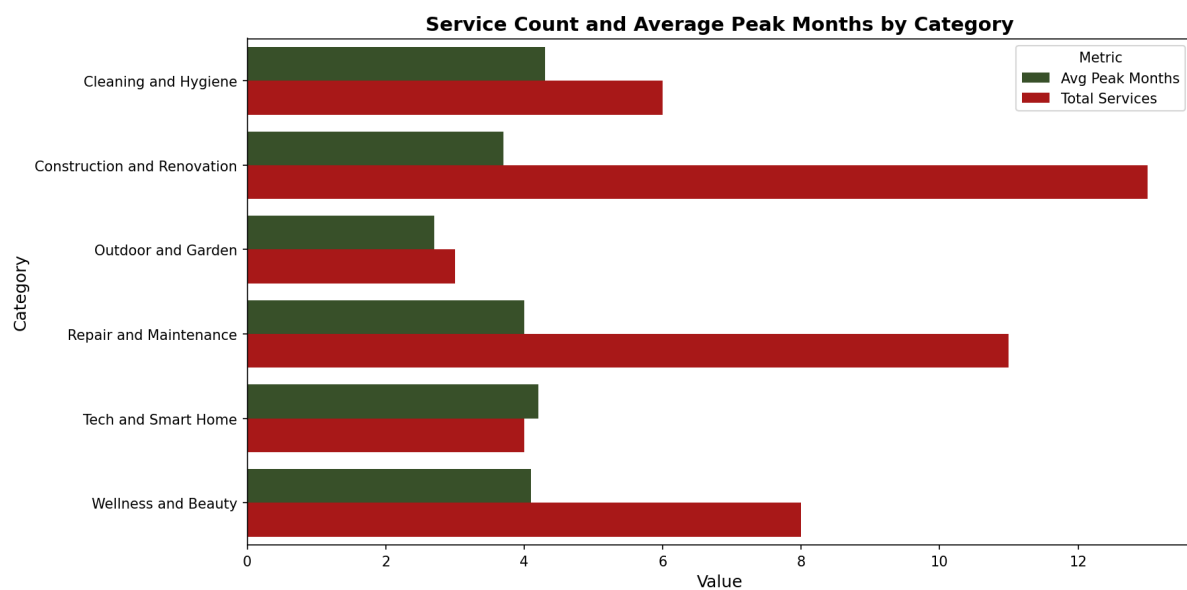

Figure 3: Service Count and Average Peak Months by Category

Cleaning and Hygiene

This category covers 6 services and averages 4.3 peak months per service, one of the highest averages across all categories. Services in this group are driven by two main forces:

- Monsoon-related hygiene concerns, which push demand for Water Tank Cleaning, Pest Control, and AirBnB Maintenance from April through August.
- Festival season preparations that boost Deep Cleaning and Packing and Moving activity in October and November ahead of Dashain and Tihar.

Construction and Renovation

With 13 services, this is the largest category in the dataset. The average of 3.7 peak months reflects the strong weather dependency of construction work. Notable patterns include:

- Pre-monsoon concentration in April and May, when homeowners rush to complete structural, finishing, and renovation work before rain halts outdoor activity.
- Post-monsoon recovery in September through November, when damage from the rains creates a second wave of demand for masonry, drywall, painting, and flooring work.
- A significant drop in July and August when active rainfall makes most construction work impractical.

Outdoor and Garden

This is the most narrowly seasonal category, averaging only 2.7 peak months per service. All 3 services follow spring and pre-monsoon timing:

- Garden Care and Indoor Planting peak in March through May as plants come alive after winter and homeowners invest in spring landscaping.
- Tree Cutting and Pruning is limited almost entirely to May and June as a precautionary measure before monsoon storms arrive.
- Winter months see virtually no High demand in this category.

Repair and Maintenance

The second-largest category with 11 services averages 4.0 peak months. Unlike construction, repair services are distributed more evenly across the year because appliance failures are not restricted to a single season. Key patterns include:

- Summer failures in cooling appliances: AC Services and Refrigerator Repair peak from April through August when units operate under maximum load.
- Monsoon-driven failures in plumbing and water systems: Plumbing Repair and RO Water Purifying peak from June through August.
- Winter-driven demand for heating appliances: Geyser Repair and Chimney Repair peak in January through February and November through December.
- Year-round steady demand for Handyman and Washing Machine Repair, which each span both cold and warm peak periods.

Tech and Smart Home

This category stands out for recording no Low demand ratings across any of its 4 services throughout the year, making it the most resilient category in the dataset. Demand drivers include:

- EV Charger Installation peaks in summer months as EV adoption grows and people prefer outdoor electrical work before monsoon rain.
- Computer Repair peaks in September through December, driven by the start of the academic year and year-end office hardware upgrades.
- CCTV Services peak from September through December as businesses and homes increase security ahead of the festive season.
- Home Automation peaks in summer for renovation projects and again in winter for smart heating and lighting setups.

Wellness and Beauty

Eight services form this category with an average of 4.1 peak months. The category follows two distinct demand patterns:

- Wedding and social season demand: Bridal Makeup and Salon at Home peak from February through May and again in September and October, aligned with auspicious dates on the Hindu calendar.
- Winter comfort demand: Spa at Home, Physiotherapy, Massage Therapy, and Chef at Home all peak in January through February and November through December when cold weather and festive hosting drive bookings.
- Pet Grooming follows a summer pattern, peaking from April through July as warmer weather increases shedding and outdoor activity in pets.

5. Key Seasonal Demand Patterns

The data reveals 4 broad seasonal windows that shape demand across the entire service portfolio. Each window is characterized by a distinct set of driver forces and active service categories.

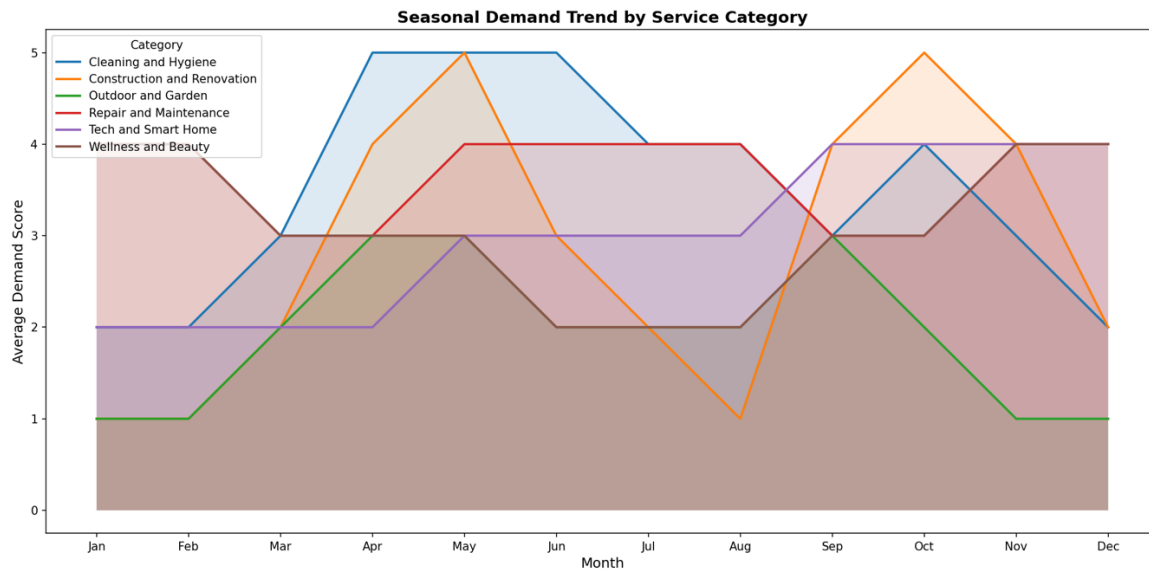

Figure 4: Seasonal Demand Trend by Service Category

Pre-Monsoon: April to May

This is the busiest period of the year. With 22 High-demand services in April and 23 in May, most categories reach peak bookings. The key forces driving it are:

- Homeowners preparing structures, walls, floors, and gardens before monsoon rain makes outdoor and heavy work difficult.
- Pre-festival cleaning and renovation in anticipation of spring celebrations.
- Rising temperatures begin to stress cooling appliances and water quality.

Monsoon: June to August

Construction activity drops during the monsoon, but overall demand does not disappear. Instead, it shifts toward a different set of services:

- Plumbing failures increase due to heavy rainfall stressing pipes and drainage systems.
- Water contamination keeps RO Water Purifying and Water Tank Cleaning in peak demand.
- Pest breeding conditions created by warmth and standing water sustain Pest Control bookings.
- AirBnB Maintenance and AC Services remain in peak demand through the tourist and heat season.

Post-Monsoon and Festive Season: September to November

The end of the monsoon and the start of Nepal's festival season drove increased construction and renovation, with 17 services reaching High demand in October and November.

- Post-rain structural damage requiring masonry, drywall, tiling, and carpentry repairs.
- Festive season home upgrades including painting, deep cleaning, and modular kitchen installations ahead of Dashain and Tihar.
- Wedding season returns in September and October, boosting Bridal Makeup and Salon at Home bookings.
- Year-end tech upgrades for CCTV, computer systems, and home automation.

Winter: December to February

The coldest months show lower overall totals but sustain meaningful demand in specific service clusters:

- Heating appliance services including Geyser Repair and Chimney Repair see their highest bookings as households switch these systems on after months of disuse.
- Wellness services including Physiotherapy, Massage Therapy, Spa at Home, and Salon at Home peak as cold weather increases demand for comfort and relaxation.
- Chef at Home and Spa at Home benefit from year-end hosting and celebration bookings in December and January.
- Washing Machine Repair peaks in January and February as heavy winter fabrics create mechanical strain on machines.

6. Key Findings

This analysis of 40 home and lifestyle services across a full calendar year point to several important patterns that define how demand moves through the seasons.

- April and May are the busiest months of the year across almost all service categories, making this the most critical window for workforce and resource planning.
- October and November represent a strong secondary peak driven by post-monsoon repair work and festive season preparations ahead of Dashain and Tihar.

- Bridal Makeup and RO Water Purifying are the most consistently in-demand services, each recording High demand across six months of the year.
- The Construction and Renovation category contains the most services and is the most sensitive to weather conditions, dropping significantly during the monsoon and recovering once the rains clear.
- Tech and Smart Home services are the most year-round resilient, with no service in this category recording Low demand in any month.
- Wellness and Beauty services follow two distinct calendars: the wedding and festival season in spring and autumn, and the winter comfort season in December through February.
- The Outdoor and Garden category is the most narrowly seasonal, averaging only 2.7 peak months per service, with almost no activity in winter.
- Repair and Maintenance services remain consistently in demand year-round, with seasonal shifts in the types of appliance repairs needed.

7. Conclusion

This report examined demand patterns across 40 home and lifestyle services using monthly booking data collected over a full calendar year. The findings confirm that service demand in Nepal is not random but follows a structured seasonal rhythm shaped by the monsoon cycle, the Hindu festival calendar, and climate-driven appliance usage.

The pre-monsoon window from April through May and the post-monsoon festive window from October through November together account for the highest concentration of peak demand across nearly all service categories. The monsoon months shift rather than suppress activity, redirecting bookings toward repair, hygiene, and cooling services. Winter months sustain a quieter but consistent wave of demand centered on wellness, heating appliances, and technology.

These patterns provide a reliable foundation for planning. Service providers who align their staffing, inventory, and promotional efforts with the demand calendar identified in this report will be better positioned to meet customer needs before peak windows arrive rather than scrambling to respond after demand has already surged.
