

SRIYOG CONSULTING

Data Analysis Internship

Progress Report

Reporting Period: June 21, 2026 – July 17, 2026 (Days 1-24)

Report Prepared: July 19, 2026

Prepared by: Sadikshya Karki

Executive Summary

This report covers the first four weeks of the Data Analysis Internship at SRIYOG Consulting, working on the On-Demand Home Services project for the HomeSewa platform in Kathmandu, Nepal. Over 24 working days, the internship progressed through five stages, moving from initial project briefing and setup, through four sprints of research, analysis, dataset, and report creation.

The work focused on building a strong data foundation for HomeSewa's business decisions. This included mapping home services to providers, professions, and training institutes, analyzing Airbnb hosts, studying AI applications in the industry, comparing the Kathmandu market against RocketSingh, modelling demand trends, developing the Business Model Canvas, sizing the market with TAM, SAM, and TOM, analyzing employee data, hr recruitment performance, competitor pricing, researching outsourcing and training partners, studying company ratings and reviews, and finally building a competitor survey form.

Alongside the core project work, time was also spent on professional development, including updating a LinkedIn profile and CV, preparing a job description, setting up an interview scheduling tool, and practicing project management with Trello. Across the four weeks, the recurring challenges were mostly related to data availability, such as missing prices, incomplete contact details, or providers without an online presence, all of which were worked through with extra verification and research effort.

Overview of the Four Weeks

Week	Days Covered	Main Focus
Week 1	Days 1-6	Service, profession, training, and Airbnb research; AI applications in home services
Week 2	Days 7-12	Kathmandu market comparison, yearly demand analysis, provider dataset, Business Model Canvas, TAM/SAM/TOM
Week 3	Days 13-18	Employee data analysis, HR recruitment performance analysis, competitor pricing analysis, professional profile setup, Trello practice, outsourcing partners, training provider research

Week 4	Days 19-24	ILO Nepal report analysis, universal services comparison, ratings and reviews, directory updates, competitor survey form
--------	------------	--

Week 1: Project Onboarding and Market Research (Days 1-6)

Day	Date	Task	Key activities and Learning
1	June 21, 2026 (Sunday)	Comparative Analysis	Researched 40 home services and the companies offering them, organized the findings into a structured Excel dataset for market mapping, visualized the data using Python in Jupyter Notebook, and prepared a report with insights.
2	June 22, 2026 (Monday)	Workforce Analysis	Researched available services and identified the different professions behind them, structured the data into an Excel dataset for workforce analysis, created supporting charts in Python and compiled the findings into a report.
3	June 23, 2026 (Tuesday)	Training Provider Analysis	Researched training institutes and identified which services had paid or free training programs available, organized the findings into a structured dataset, visualized the results using Python and prepared a detailed report.
4	June 24, 2026 (Wednesday)	Airbnb Provider Analysis	Researched Airbnb service providers and collected relevant business and website information, then organized the findings into a structured Excel dataset for further analysis.

5	June 25, 2026 (Thursday)	Airbnb Provider Analysis	Organized the Airbnb research into a structured dataset, built visualizations using Python in Jupyter Notebook, and completed an analysis report based on the findings.
6	June 26, 2026 (Friday)	AI Applications Research	Researched three AI applications used in the on-demand home service industry and built a presentation covering the problems they solve, the data they use, their benefits, their limitations, and how they could help RocketSingh.

Week 2: Market Comparison and Business Foundations (Days 7-12)

Day	Date	Task	Key activities and Learning
7	June 28, 2026 (Sunday)	RocketSingh Market Comparison	Studied the RocketSingh market comparison report and used it as a framework to research the Kathmandu home services market, covering competitor presence, service availability, and market saturation.
8	June 29, 2026 (Monday)	Yearly Demand Analysis	Researched yearly demand trends for 40 home services and analyzed seasonal patterns, mapping each service across all 12 months with demand levels and remarks.
9	June 30, 2026 (Tuesday)	Yearly Demand Analysis	Analyzed the yearly demand dataset, identified the key demand patterns across services, and prepared a

			detailed analysis report on the findings.
10	July 1, 2026 (Wednesday)	Home Service Providers Dataset	Researched all home service providers in Kathmandu, listed the services each one offers, and mapped them into a structured dataset.
11	July 2, 2026 (Thursday)	HomeSewa Business Model Canvas	Studied the nine components of the Business Model Canvas and write a detailed article explaining how each one applies to the HomeSewa business model.
12	July 3, 2026 (Friday)	TAM, SAM and TOM Market Analysis	Researched TAM, SAM, and TOM for home-based services in Nepal, and prepared a structured dataset along with an analysis report on market size and service coverage.

Week 3: Pricing, Partnership, and Professional Development (Days 13-18)

Day	Date	Task	Key activities and Learning
13	July 5, 2026 (Sunday)	HomeSewa Pricing Analysis	Researched competitor pricing across all HomeSewa services, identifying three competing providers per service and organizing their starting prices into an Excel dataset for comparison.
14	July 6, 2026 (Monday)	Professional Development and Internship Profile Setup	Updated my LinkedIn profile with internship experience, created a professional CV in Google Docs, wrote a Data Analyst internship job description, and set up a Cal.com

			account with a personalized interview scheduling link.
15	July 7, 2026 (Tuesday)	Project Management with Trello	Practiced project management in Trello by creating boards, lists, and cards, organizing tasks, setting priorities, assigning due dates, and tracking progress.
16	July 8, 2026 (Wednesday)	Partnership Companies for Professional Outsourcing	Researched potential outsourcing partner companies through Google and online directories, identifying providers relevant to HomeSewa services.
17	July 9, 2026 (Thursday)	Partnership Companies for Professional Outsourcing	Continued researching offline based service providers, verified their services, and organized the findings into a structured Excel dataset of potential partnership opportunities.
18	July 10, 2026 (Friday)	Training Provider Companies Analysis	Used Python to scrape training provider information related to HomeSewa services, verified the results, and built a structured dataset with providers, locations, contact details, and source links.

Week 4: Data Enrichment and Survey Design (Days 19-24)

Day	Date	Task	Key activities and Learning
19	July 12, 2026 (Sun)	ILO Nepal Annual Analysis	Extracted and structured data from the ILO Nepal Annual Report infographic, analyzed it in Python using Pandas, Matplotlib, and Seaborn, and prepared visualizations and an analysis report.

20	July 13, 2026 (Mon)	Universal Services Comparison	Compiled a comprehensive, categorized list of universal services and compared the offerings of RocketSingh, HomeSewa, Tackles, BuildingSewa, and GardenSewa to see which services each company provides.
21	July 14, 2026 (Tue)	Home Service Companies Ratings and Reviews	Researched Google Maps ratings and review count for home service companies in Nepal, verified the details, and organized everything into a structured Excel dataset.
22	July 15, 2026 (Wed)	Home Service Provider Directory	Researched additional home service providers, verified their official websites and phone numbers, and updated the existing directory dataset with this information.
23	July 16, 2026 (Thu)	Training Provider Dataset Enhancement	Researched and verified contact details, phone numbers, mobile numbers, and email addresses for training providers, and updated the existing dataset accordingly.
24	July 17, 2026 (Fri)	Competitor Survey Form Development	Designed a survey form in Google Forms to collect company details, services offered, employee information, and business profiles from home service providers, and linked it to Google Sheets for automatic response collection.

Project Timeline (Gantt Chart)

The Gantt chart below tracks the internship timeline from the Initiation Stage through Sprint 4, showing how each research and analysis task was sequenced across the four weeks.

The chart shows five stages: Initiation, Sprint 1, Sprint 2, Sprint 3, and Sprint 4, each running for about one week and made up of daily standups plus a sequence of research, dataset and report tasks, with each task starting right after the previous one wraps up.

Skills Gained

- Structured market research: mapping services to providers, professions, and training institutes across a large, varied dataset.
- Data organization and Excel dataset design for market, pricing, demand, and directory data.
- Comparative and competitive market analysis, including adapting an existing framework (RocketSingh) to a new market.

- Market sizing using TAM, SAM, and TOM, and business modeling using the Business Model Canvas.
- Python based data collection and analysis, including web scraping and using Pandas, Matplotlib, and Seaborn for visualization.
- Survey design and integrating Google Forms with Google Sheets for automated data collection.
- Project management practice using Trello, and professional profile development including LinkedIn, CV writing, and interview scheduling with Cal.com.

Conclusion

The first four weeks of the internship built a solid data foundation for the On-Demand Home Services project, covering market research, competitor analysis, demand trends, pricing, partnerships, and survey design. Alongside the project deliverables, the internship also supported professional growth through profile development and hands-on project management practice. The datasets and reports produced during this period are ready to support HomeSewa's ongoing market strategy and decision making.
