

SRIYOG CONSULTING

Data Analysis Internship

Progress Report

Reporting Period: June 21, 2026 – August 28, 2026 (Days 1-60)

Report Prepared: August 28, 2026

Prepared by: Sadikshya Karki

Executive Summary

This report covers the full 60-day Data Analysis Internship at SRIYOG Consulting, spanning ten weeks of work on the On-Demand Home Services project for the HomeSewa platform and, from Week 8 onward, the GardenSewa gardening-services vertical, both based in Kathmandu, Nepal.

The first four weeks (Days 1-24) built the core data foundation for HomeSewa: mapping home services to providers, professions, and training institutes; analyzing Airbnb hosts; studying AI applications in the industry; comparing the Kathmandu market against RocketSingh; modelling demand trends; developing the Business Model Canvas; sizing the market with TAM, SAM, and TOM; analyzing employee data and HR recruitment performance; researching competitor pricing, outsourcing, and training partners; studying company ratings and reviews; and building a competitor survey form. Alongside the core project work, time was also spent on professional development, including updating a LinkedIn profile and CV, preparing a job description, setting up an interview scheduling tool, and practicing project management with Trello.

Week 5 (Days 25-30) opened with the compilation of that 4-week report, then shifted to content creation: twelve data analytics blog topics were identified and developed into twelve full articles covering career roadmaps, interview preparation, SQL, Excel, Python, data visualization, data cleaning, statistics, Power BI, common beginner mistakes, and portfolio building, each formatted with banner images and supporting visuals.

Weeks 6 and 7 (Days 31-42) returned to core market research: a Universal Services Comparison notebook benchmarked five platforms across 250 services; a Professional Service Provider study mapped individual and business providers across 30 service categories in Kathmandu, Bhaktapur, and Lalitpur; a top-30 highest-demand services shortlist was drawn from a 150+ service master catalog; and a comprehensive HomeSewa sponsor company dataset was researched and compiled across every assigned service category.

From Week 8 onward (Days 43-60), the focus moved to GardenSewa, applying the same research methodology developed for HomeSewa to a new vertical: a Comparative Analysis and Yearly Services study of 20 gardening-related service categories, a Workforce Analysis with supply-and-demand formulas, a Training Providers study, a set of onboarding guidelines for new Data Analyst interns, a consolidated GardenSewa presentation deck, a full Business

Model Canvas, and a two-part Ratings and Reviews study of Service Providers and Training Providers, closing with this final ten-week progress report.

Across all ten weeks, the recurring challenges were mostly related to data availability, such as missing prices, incomplete contact details, providers without an online presence, or categories with very few listings (particularly for GardenSewa's training providers and a handful of niches HomeSewa services). These were worked through with extra verification, source cross-checking, and, where necessary, transparent notes on data gaps rather than invented figures.

Overview of the Four Weeks

Week	Days Covered	Main Focus
Week 1	Days 1-6	Service, profession, training, and Airbnb research; AI applications in home services
Week 2	Days 7-12	Kathmandu market comparison, yearly demand analysis, provider dataset, Business Model Canvas, TAM/SAM/TOM
Week 3	Days 13-18	Employee data analysis, HR recruitment performance analysis, competitor pricing analysis, professional profile setup, Trello practice, outsourcing partners, training provider research
Week 4	Days 19-24	ILO Nepal report analysis, universal services comparison, ratings and reviews, directory updates, competitor survey form
Week 5	Days 25-30	Four-week progress report compilation; data analytics blog content planning and article writing
Week 6	Days 31-36	Universal Services Comparison notebook; Professional Service Provider research and dataset across 30 categories; top services shortlisting
Week 7	Days 37-42	HomeSewa sponsor company research and dataset compilation across all service categories
Week 8	Days 43-48	GardenSewa Comparative Analysis and Yearly Services research, dataset preparation, and reporting
Week 9	Days 49-54	GardenSewa Workforce Analysis, new intern guidelines, and Training Providers research and reporting
Week 10	Days 55-60	GardenSewa presentation deck, Business Model Canvas, ratings and reviews, and final internship progress report

Week 1: Project Onboarding and Market Research (Days 1-6)

Day	Date	Task	Key activities and Learning
1	June 21, 2026 (Sunday)	Comparative Analysis	Researched 40 home services and the companies offering them, organized the findings into a structured Excel dataset for market mapping, visualized the data using Python in Jupyter Notebook, and prepared a report with insights.
2	June 22, 2026 (Monday)	Workforce Analysis	Researched available services and identified the different professions behind them, structured the data into an Excel dataset for workforce analysis, created supporting charts in Python and compiled the findings into a report.
3	June 23, 2026 (Tuesday)	Training Provider Analysis	Researched training institutes and identified which services had paid or free training programs available, organized the findings into a structured dataset, visualized the results using Python and prepared a detailed report.
4	June 24, 2026 (Wednesday)	Airbnb Provider Analysis	Researched Airbnb service providers and collected relevant business and website information, then organized the findings into a structured Excel dataset for further analysis.
5	June 25, 2026 (Thursday)	Airbnb Provider Analysis	Organized the Airbnb research into a structured dataset, built visualizations using Python in Jupyter Notebook, and completed an analysis report based on the findings.
6	June 26, 2026 (Friday)	AI Applications Research	Researched three AI applications used in the on-demand home service industry and built a presentation covering the problems they solve, the data they use, their benefits, their limitations, and how they could help RocketSingh.

Week 2: Market Comparison and Business Foundations (Days 7-12)

Day	Date	Task	Key activities and Learning
7	June 28, 2026 (Sunday)	RocketSingh Market Comparison	Studied the RocketSingh market comparison report and used it as a framework to research the Kathmandu home services market, covering competitor presence, service availability, and market saturation.
8	June 29, 2026 (Monday)	Yearly Demand Analysis	Researched yearly demand trends for 40 home services and analyzed seasonal patterns, mapping each service across all 12 months with demand levels and remarks.
9	June 30, 2026 (Tuesday)	Yearly Demand Analysis	Analyzed the yearly demand dataset, identified the key demand patterns across services, and prepared a detailed analysis report on the findings.
10	July 1, 2026 (Wednesday)	Home Service Providers Dataset	Researched all home service providers in Kathmandu, listed the services each one offers, and mapped them into a structured dataset.
11	July 2, 2026 (Thursday)	HomeSewa Business Model Canvas	Studied the nine components of the Business Model Canvas and write a detailed article explaining how each one applies to the HomeSewa business model.
12	July 3, 2026 (Friday)	TAM, SAM and TOM Market Analysis	Researched TAM, SAM, and TOM for home-based services in Nepal, and prepared a structured dataset along with an analysis report on market size and service coverage.

Week 3: Pricing, Partnership, and Professional Development (Days 13-18)

Day	Date	Task	Key activities and Learning
13	July 5, 2026 (Sunday)	HomeSewa Pricing Analysis	Researched competitor pricing across all HomeSewa services, identifying three competing providers per service and organizing their starting prices into an Excel dataset for comparison.
14	July 6, 2026 (Monday)	Professional Development and Internship Profile Setup	Updated my LinkedIn profile with internship experience, created a professional CV in Google Docs, wrote a Data Analyst internship job description, and set up a Cal.com account with a personalized interview scheduling link.
15	July 7, 2026 (Tuesday)	Project Management with Trello	Practiced project management in Trello by creating boards, lists, and cards, organizing tasks, assigning due dates, and tracking progress.
16	July 8, 2026 (Wednesday)	Partnership Companies for Professional Outsourcing	Researched potential outsourcing partner companies through Google and online directories, identifying providers relevant to HomeSewa services.
17	July 9, 2026 (Thursday)	Partnership Companies for Professional Outsourcing	Continued researching offline based service providers, verified their services, and organized the findings into a structured Excel dataset of potential partnership opportunities.
18	July 10, 2026 (Friday)	Training Provider Companies Analysis	Used Python to scrape training provider information related to HomeSewa services, verified the results, and built a structured dataset with providers, locations, contact details, and source links.

Week 4: Data Enrichment and Survey Design (Days 19-24)

Day	Date	Task	Key activities and Learning
19	July 12, 2026 (Sunday)	ILO Nepal Annual Analysis	Extracted and structured data from the ILO Nepal Annual Report infographic, analyzed it in Python using Pandas, Matplotlib, and Seaborn, and prepared visualizations and an analysis report.
20	July 13, 2026 (Monday)	Universal Services Comparison	Compiled a comprehensive, categorized list of universal services and compared the offerings of RocketSingh, HomeSewa, Tackles, BuildingSewa, and GardenSewa to see which services each company provides.
21	July 14, 2026 (Tuesday)	Home Service Companies Ratings and Reviews	Researched Google Maps ratings and review count for home service companies in Nepal, verified the details, and organized everything into a structured Excel dataset.
22	July 15, 2026 (Wednesday)	Home Service Provider Directory	Researched additional home service providers, verified their official websites and phone numbers, and updated the existing directory dataset with this information.
23	July 16, 2026 (Thursday)	Training Provider Dataset Enhancement	Researched and verified contact details, phone numbers, mobile numbers, and email addresses for training providers, and updated the existing dataset accordingly.
24	July 17, 2026 (Friday)	Competitor Survey Form Development	Designed a survey form in Google Forms to collect company details, services offered, employee information, and business profiles from home service providers, and linked it to Google Sheets for automatic response collection.

Week 5: Progress Reporting and Data Analytics Content Creation (Days 25-30)

Day	Date	Task	Key activities and Learning
25	July 19, 2026 (Sunday)	Progress Report (4 Weeks)	Reviewed and consolidated all work completed across the first four weeks of the internship and compiled everything into a structured 4-week progress report.
26	July 20, 2026 (Monday)	Data Analytics Blog Article	Researched and finalized a list of 12 blog topics related to data analytics, then wrote two complete articles: a beginner's roadmap to data analytics and a set of 30 interview questions and answers for freshers.
27	July 21, 2026 (Tuesday)	Data Analytics Blog Article	Prepared 3 proper blog articles with images in Google Docs format: Virtual Interview Preparation, SQL for Data Analytics, and Excel Skills, each with a banner image, structured headings, and supporting visuals.
28	July 22, 2026 (Wednesday)	Data Analytics Blog Article	Prepared 3 proper blog articles with images: Data Visualization Basics, Python for Data Analytics, and Data Cleaning Techniques, each formatted with a banner image, headings, and supporting visuals.
29	July 23, 2026 (Thursday)	Data Analytics Blog Article	Prepared 2 proper blog articles with images: Statistics for Data Analytics and Power BI for Beginners, both including a banner image, structured headings, and relevant visuals.
30	July 24, 2026 (Friday)	Data Analytics Blog Article	Prepared 2 proper blog articles with images: Common Beginner Mistakes in Data Analytics and How to Build a Data Analytics Portfolio, formatted with banner images and supporting visuals.

Week 6: Universal Services Comparison and Professional Provider Research (Days 31-36)

Day	Date	Task	Key activities and Learning
31	July 26, 2026 (Sunday)	Universal Services Comparison	Prepared a Jupyter Notebook comparing RocketSingh, HomeSewa, Tackles, BuildingSewa, and GardenSewa across 250 services, added charts, a summary table, and written insights, then exported the notebook to PDF.
32	July 27, 2026 (Monday)	Professional Service Providers (Research)	Researched Google Maps to find service providers across Kathmandu, Bhaktapur, and Lalitpur for 9 of 30 assigned categories (Salon at Home, Bridal Makeup, Chef at Home, Massage Therapy, Spa at Home, Physiotherapy, Handyman, Carpentry, Plumbing), collecting name, city, contact, rating, reviews, and source link.
33	July 28, 2026 (Tuesday)	Professional Service Providers (Research)	Continued the Google Maps research, completing 12 more of the 30 categories (Electrical Repairs, Tiling, Washing Machine Repair, Home Automation, EV Charger Installation, AC Services, Painting, Indoor Planting, CCTV Services, Drywall Repair, Modular Kitchen, Parqueting).
34	July 29, 2026 (Wednesday)	Professional Service Providers (Research)	Completed the final 9 of 30 assigned categories (Home Renovation, RO Water Purifying, Garden Care, Pest Control, Masonry Repair, Deep Cleaning, Packing and Moving, Airbnb Maintenance, Refrigerator Repair), finishing all 30 categories of provider research.
35	July 30, 2026 (Thursday)	Top Services Shortlisting	Prepared a curated shortlist of the top 30 highest-demand home and property services for the

			Kathmandu market across six brands, then began converting the Professional Service Provider research notes into a structured Excel dataset, completing half of it.
36	July 31, 2026 (Friday)	Professional Service Providers Dataset	Completed the Excel dataset for Professional Service Provider Research, with provider name, city, contact, rating, reviews, and source link for all 30 categories.

Week 7: HomeSewa Sponsor Company Research (Days 37-42)

Day	Date	Task	Key activities and Learning
37	August 2, 2026 (Sunday)	HomeSewa Sponsor Companies	Researched sponsor companies relevant to HomeSewa service categories, collecting Services, Company Name, Company Type, Contact, City, and Source Link. Completed 5 categories: Salon at Home, Bridal Makeup, Massage Therapy, Spa at Home, and Handyman.
38	August 3, 2026 (Monday)	HomeSewa Sponsor Companies	Continued sponsor company research, completing 5 more categories: Carpentry, Plumbing, Electrical Repairs, Tiling, and Masonry Repair.
39	August 4, 2026 (Tuesday)	HomeSewa Sponsor Companies	Continued sponsor company research, completing 7 categories: Painting, Indoor Planting, CCTV Services, RO Water Purifying, Garden Care, Pest Control, and Deep Cleaning.
40	August 5, 2026 (Wednesday)	HomeSewa Sponsor Companies	Completed sponsor company research for the final 5 categories: Parqueting, Drywall Repair, Washing Machine Repair, AC Services, and Refrigerator Repair, finishing researches for all assigned service categories.
41	August 6, 2026 (Thursday)	HomeSewa Sponsor Companies	Organized and structured half of the collected sponsor company research data into a proper format for Excel compilation, reviewing

			Services, Company Name, Company Type, Contact, City, and Source Link for consistency and accuracy.
42	August 7, 2026 (Friday)	HomeSewa Sponsor Companies	Completed the organization and compilation of all collected sponsor company research data into a single, properly formatted Excel sheet covering all HomeSewa service categories.

Week 8: GardenSewa Comparative Analysis and Yearly Services (Days 43-48)

Day	Date	Task	Key activities and Learning
43	August 9, 2026 (Sunday)	Comparative Analysis (GardenSewa)	Conducted research for the GardenSewa comparative analysis, searching each of the 20 service categories on Google and collecting links of companies and service providers offering those services.
44	August 10, 2026 (Monday)	Comparative Analysis (GardenSewa)	Prepared the Excel sheet for the GardenSewa comparative analysis using the links collected the previous day, organizing the data into Service, Company Name, Type, Contact, Location, and URL for all 20 categories.
45	August 11, 2026 (Tuesday)	Comparative Analysis (GardenSewa)	Prepared charts and graphs using Matplotlib and Pandas in a Jupyter Notebook, added insights, an introduction, and key findings, then exported the completed notebook as an HTML report, completing the comparative analysis.
46	August 12, 2026 (Wednesday)	Yearly Services (GardenSewa)	Researched the seasonal demand pattern for all 20 GardenSewa service categories, mapping each service's monthly demand level against Nepal's climate calendar and major festivals, and recorded the findings in a text file.

47	August 13, 2026 (Thursday)	Yearly Services (GardenSewa)	Prepared the Excel sheet for GardenSewa Yearly Services using the collected data, organizing all 20 categories into Service Name, Category, monthly demand (Jan-Dec), Peak Season, and Remarks.
48	August 14, 2026 (Friday)	Yearly Services (GardenSewa)	Built visualizations in a Jupyter Notebook using Matplotlib, Seaborn, and Pandas to chart monthly demand trends, added an introduction, insights, and key findings, then exported the notebook as an HTML report, completing the project.

Week 9: GardenSewa Workforce Analysis and Training Providers (Days 49-54)

Day	Date	Task	Key activities and Learning
49	August 16, 2026 (Sunday)	Workforce Analysis (GardenSewa)	Prepared the Workforce Analysis Excel sheet using the GardenSewa comparative analysis data, building formulas for Provider Found, Rank, % Formal Companies, % App or Platform, and % Directory or Informal, and assessing Demand Level and Competition Level to determine Supply Status.
50	August 17, 2026 (Monday)	Workforce Analysis (GardenSewa)	Prepared charts and graphs using Matplotlib, Seaborn, and Pandas in a Jupyter Notebook, added insights, an introduction, and key findings, then exported the notebook as an HTML report, completing the Workforce Analysis.
51	August 18, 2026 (Tuesday)	New Interns Guidelines (Data Analyst)	Prepared a set of guidelines in Google Docs for newly joined Data Analyst interns, covering key practices and lessons from the internship experience, and began

			researching Nepal-based training providers for GardenSewa services.
52	August 19, 2026 (Wednesday)	Training Providers (GardenSewa)	Completed the research on Nepal-based training providers offering training for GardenSewa services, finishing the remaining categories and compiling all findings into a text file.
53	August 20, 2026 (Thursday)	Training Providers (GardenSewa)	Prepared the Excel sheet for GardenSewa Training Providers using the collected research data, organizing the findings into structured columns for further analysis.
54	August 21, 2026 (Friday)	Training Providers (GardenSewa)	Prepared charts and graphs in a Jupyter Notebook, added insights, an introduction, and key findings, then exported the notebook as an HTML report, completing the GardenSewa Training Providers project.

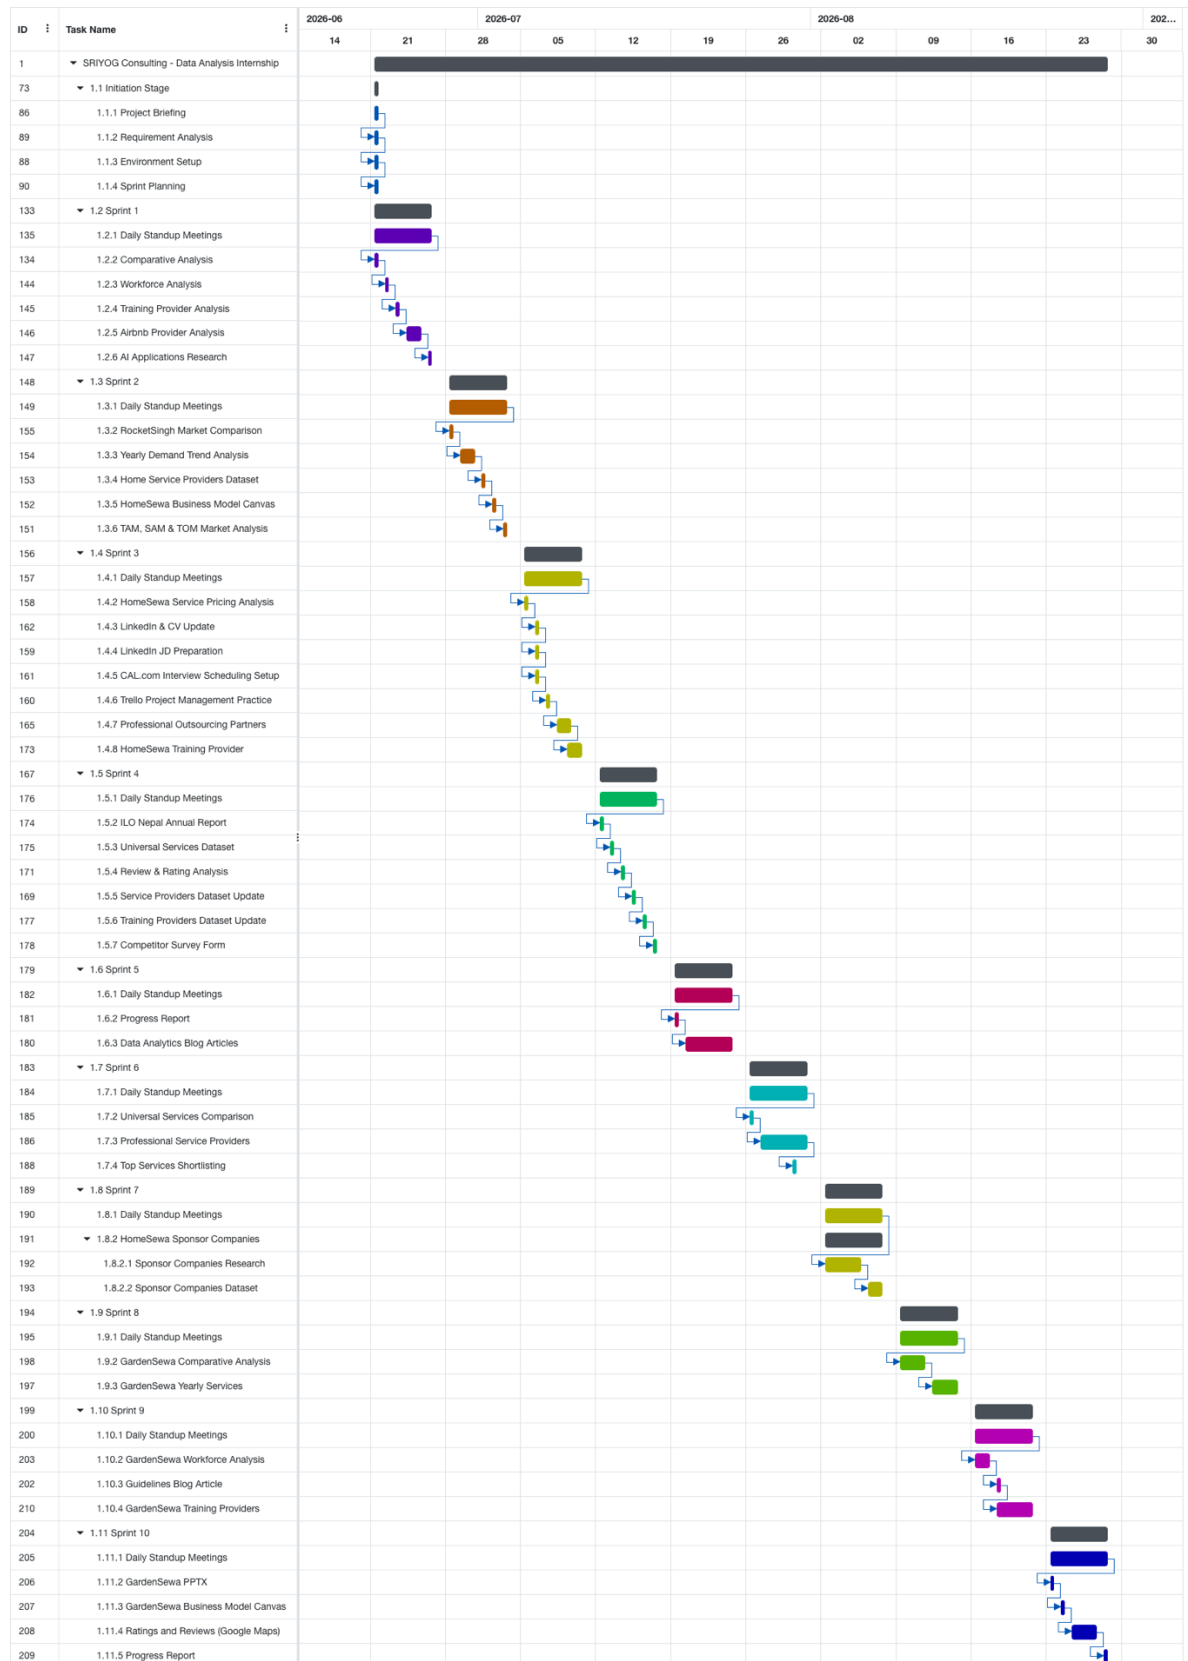

Week 10: GardenSewa Presentation, Business Model Canvas, and Final Reporting (Days 55-60)

Day	Date	Task	Key activities and Learning
55	August 23, 2026 (Sunday)	GardenSewa PPTX	Prepared the GardenSewa presentation slides using charts created and saved from the Jupyter Notebooks, covering Comparative Analysis, Yearly Services, Workforce Analysis, and Training Providers, with a title, description, and insight added for each chart.
56	August 24, 2026 (Monday)	GardenSewa Business Model Canvas	Researched GardenSewa's website covering its services, clients, and operations, then filled in all nine Business Model Canvas blocks, compiled them

			into a single canvas table, and wrote up the benefits and a short conclusion.
57	August 25, 2026 (Tuesday)	Ratings and Reviews	Collected Google Maps Ratings and Number of Reviews, along with Contact, Location, and Website details, for companies providing GardenSewa-type services, compiling the first of two sheets covering Service Providers.
58	August 26, 2026 (Wednesday)	Ratings and Reviews	Collected Google Maps Ratings and Number of Reviews for GardenSewa-related Training Providers, compiling the second sheet with Training Offered, Contact, Location, Rating, Reviews, and Website Link, completing the two-sheet file.
59	August 27, 2026 (Thursday)	Ratings and Reviews	Prepared the final report based on the Ratings and Reviews data collected for GardenSewa's Service Providers and Training Providers, summarizing which companies have strong ratings and review volumes and how the market compares overall.
60	August 28, 2026 (Friday)	Progress Report	Reviewed and consolidated all work completed across the full 60-day internship and compiled the final ten-week progress report covering Weeks 1 through 10.

Project Timeline (Gantt Chart)

The Gantt chart below tracks the internship timeline across all ten weeks, from the Initiation Stage through Sprint 10, showing how each research and analysis task was sequenced across the sixty days.

The chart shows the project's stages, each running for about one week and made up of daily standups plus a sequence of research, dataset and report tasks, with each task starting right after the previous one wraps up.

Skills Gained

- Structured market research: mapping services to providers, professions, and training institutes across large, varied datasets for both HomeSewa and GardenSewa.
- Data organization and Excel dataset design for market, pricing, demand, workforce, and directory data, including formula-driven analysis (rank, percentage share, supply status).
- Comparative and competitive market analysis, including adapting an existing framework (RocketSingh) to new markets and verticals.
- Market sizing using TAM, SAM, and TOM, and business modelling using the Business Model Canvas for two different companies.
- Python-based data collection and analysis, including web scraping and using Pandas, Matplotlib, and Seaborn for visualization, with notebooks exported to PDF and HTML reports.
- Content writing and blog development: planning a topic pipeline and producing twelve fully formatted articles with banner images and supporting visuals.
- Survey design and integrating Google Forms with Google Sheets for automated data collection.
- Presentation design, translating chart-based analysis into a polished, insight-driven slide deck.
- Project management practice using Trello, and professional profile development including LinkedIn, CV writing, and interview scheduling with Cal.com.
- Documentation and reflective writing, including preparing onboarding guidelines for incoming interns and consolidating sixty days of work into structured progress reports.

Conclusion

Over sixty days, the internship progressed from building a data foundation for HomeSewa's On-Demand Home Services project to extending the same research and analysis methodology to the GardenSewa vertical, while also contributing content and professional-development work along the way. The datasets, notebooks, reports, and presentations produced across the ten weeks are ready to support HomeSewa's and GardenSewa's ongoing market strategy and decision-making, and the experience has strengthened research, data analysis, visualization, reporting, and communication skills that will carry forward beyond this internship.
