

GardenSewa

Ratings and Reviews Report

Prepared for: Sriyog Consulting

Prepared by: Sadikshya Karki

Date: August 2026

1. Introduction

This report looks at the Google Maps rating and number of reviews collected for companies that offer services like GardenSewa and for training providers that offer training related to those services. The data was collected in two parts. The first part covers Service Providers, and the second part covers Training Providers. This report brings both parts together and shares what the numbers show.

2. Service Providers

A total of 24 service providers were checked on Google Maps. Out of these, 23 companies had rating and review count available. One company, Aadarsh Pest Control, did not have a rating or review count listed on Google Maps.

The ratings for the service providers were mostly high. Most companies had a rating of 4 stars or above. The average rating among the 23 companies with data came to about 4.6 out of 5. Seven companies had the highest possible rating of 5 stars. These are Champs's Garden Care, Facility Service, Hamro Nursery, Modern Cleaning and Servicing, Nepal Cleaning Solution, Sourcing Nepal, and United Facility Service.

When it comes to the number of reviews, there is a big difference between companies. Some companies have received a very large number of reviews, while others have only a handful. The companies with the highest number of reviews are:

- Pest Defence Service, rating 4.9, with 1148 reviews
- Orange Ball, rating 4.9, with 1110 reviews
- Technical Sewa, rating 4.8, with 444 reviews
- Sajilo Sewa, rating 4.4, with 256 reviews

On the other hand, some companies with a perfect 5-star rating have only a small number of reviews, such as Hamro Nursery with 3 reviews, Modern Cleaning and Servicing, and Sourcing Nepal with 4 reviews each. This shows that a high rating alone does not always mean the company is well known. The number of reviews also matters, since it shows how many customers have used the service and left feedback.

The lowest rating among the service providers was Smart care, with a rating of 3.9 and 73 reviews.

3. Training Providers

A total of 13 training providers were checked on Google Maps. Out of these, 11 had a rating and review count available. Two providers, Global Reliance Training Center Pvt. Ltd. and Green Smith Nepal, did not have this information listed.

The ratings for training providers were also high overall. The average rating among the 11 providers with data came to about 4.8 out of 5, which is slightly higher than the average for service providers. Four training providers had a perfect 5-star rating. These are AIM Technical Institute, Organic Farm Nepal, Trade Link Nepal Pvt. Ltd., and Universal Technical Institute and Orientation Center Pvt. Ltd., and it is worth noting that some of these have very few reviews.

The training providers with the highest number of reviews are:

- Nikhil Multi Services Pvt. Ltd., rating 4.9, with 559 reviews
- Skills Nepal, rating 4.9, with 239 reviews
- HASERA Permaculture Learning Center, rating 4.9, with 156 reviews
- Kumari Flora, rating 3.9, with 45 reviews

The lowest rating among the training providers was Kumari Flora, with a rating of 3.9, even though it has a fair number of reviews at 45. Some training providers with a perfect 5-star rating, such as Organic Farm Nepal, have only 1 review, so that rating is based on very little feedback.

4. Overall Comparison

When we compare both groups, training providers have a slightly higher average rating than service providers, 4.8 compared to 4.6. However, service providers as a group have more companies with a very high number of reviews, such as Pest Defence Service and Orange Ball, both crossing 1000 reviews. This shows that GardenSewa type service providers are being used and reviewed by many customers, more so than training providers in this list.

Both groups show the same pattern; a good number of companies have high ratings but very few reviews. This means their rating may not fully represent how well known or trusted they are in the market, since it is based on a small number of customers. Companies with both a high rating and a high number of reviews, like Orange Ball, Pest Defence Service, Technical Sewa, Nikhil Multi Services, and Skills Nepal, can be seen as the strongest performers in terms of customer trust and reach.

A few companies did not have any rating or review information available on Google Maps at all. This includes Aadarsh Pest Control from the service providers list, and Global Reliance Training Center Pvt. Ltd. and Green Smith Nepal from the training providers list. This could mean these businesses have a limited or no presence on Google Maps.

5. Conclusion

Overall, the ratings and reviews data shows that most companies offering GardenSewa type services and training are viewed positively by their customers, with ratings mostly above 4 out of 5. But the number of reviews varies a lot, and this is an important factor to look at along

with the rating, since it shows the real reach and trust a company has built with its customer. This data can help GardenSewa understand where it stands compared to other players in the market, both on the service side and training side.
