Nepal

On-Demand Home Services in Kathmandu
Competitive Landscape, Service Mapping and Market Gap
Analysis

Prepared for: Sriyog Consulting

Prepared by: Sadikshya Karki

Date: June 2026

Research Scope: Kathmandu, Nepal

Acknowledgement

I would like to express my sincere gratitude to my internship supervisor for their continuous guidance, feedback, and support throughout the course of this project. Their guidance and support greatly helped in shaping the direction and overall quality of this research.

I am also grateful to Sriyog Consulting for providing me with the opportunity to undertake this internship, which allowed me to gain practical exposure to market research and data analysis in the home services sector of Nepal.

This experience has been valuable in enhancing my understanding of real-world data collection, analysis, and industrial mapping.

1. Executive Summary

The on-demand home service sector in Kathmandu, Nepal, is a growing market driven by rapid urbanization, changing lifestyles, and increasing awareness of convenience-based services. This report expands coverage from the initial 14 companies to a total of 25 companies operating in Kathmandu Valley. Across these 25 companies, 267 individual services were identified and classified into seven broad categories: Home Repair, Technical Services, Cleaning and Maintenance, Care Services, Lifestyle and Miscellaneous, Healthcare Services, and Professional Services.

The market remains highly fragmented, with most providers specializing in one or two categories. No single platform currently offers a fully integrated, app-based, multi-service experience with transparent pricing and real-time tracking. This creates a clear opening for a well-structured platform like Tackles Pro.

Key Highlights

- Total companies identified and analyzed: 25
- Total individual services catalogued: 267
- Dominant categories: Home Repair (28.8%) and Technical Services (28.5%)
- Most saturated services: Plumbing, Electrical Repairs, Housekeeping
- Market maturity: Early-to-growing stage with limited digital adoption
- Key opportunities: Pressure Washing (absent), Airbnb Maintenance (absent), EV Charger Installation (1 provider only), Smart Home Automation (partial coverage only)

2. Objective of the Study

The primary purpose of this study is to understand the current landscape of the on-demand home service market in Nepal, with a particular focus on Kathmandu. The research was guided by the following objectives:

- Search for home service companies in Nepal and identify how many are providing services
- Explore a total of 25 companies operating in Kathmandu
- Review all services listed on Tackles Pro (tackles.pro) and determine which are already provided in Nepal

- Extract all services from each company website and classify them by category
- Map each service to the companies that offer it
- Analyze pricing visibility and e-commerce maturity levels across companies
- Identify perspective opportunities and business verticals that can be penetrated in home services
- Create supporting graphs and charts for visual analysis

3. Research Methodology

This research was conducted through secondary, desk-based methods. Google Search queries such as home service in Nepal and on-demand home service Kathmandu were used to discover active companies. Each identified company website was individually visited to extract service offerings, descriptions, and coverage areas. Tackles Pro's official website was reviewed to identify its current service list, which served as the benchmark for the gap analysis. All 25 company websites were explored and services were recorded exactly as named, then grouped into seven categories for analysis. Data was compiled into a structured dataset and visualized using Python (matplotlib and seaborn).

4. Market Overview

In Nepal, home services refer to professional services delivered directly to a client's residence on demand. This includes technical repair and maintenance (plumbing, electrical, appliance repair), domestic help (housekeeping, babysitting, elder care), cleaning services, and healthcare at home (nurse visits, lab tests, IV therapy). Booking is done via phone, WhatsApp, or website.

Market Demand Drivers

- **Urbanization:** Rapid population growth in Kathmandu has increased demand for outsourced domestic and maintenance services.
- **Dual-Income Households:** Working families have less time for household chores, fueling demand for housekeeping, cleaning, and care services.
- **Aging Population:** Nepal's growing elderly population drives consistent demand for eldercare and nursing services at home.
- **Convenience Culture:** Younger, urban populations increasingly prefer on-demand, digital-first service solutions.

- **Post-COVID Awareness:** The pandemic accelerated adoption of home-based healthcare services.

Digital Adoption Level

The sector's digital maturity is low-to-moderate. Most companies rely on phones or WhatsApp for bookings. Only Sajilo Sewa, Smart Home Sewa, and NepFix have structured online booking systems. Mobile applications are virtually absent across all 25 companies reviewed. This creates a significant opportunity for a platform with app-based booking, real-time tracking, and digital payments.

5. Companies Identified

Through research, 25 active home service companies were identified in Kathmandu. Table 1 summarizes each company with their website, primary focus, and number of services offered.

Table 1: Summary of Identified Home Service Companies in Nepal

No.	Company Name	Website	Primary Focus	Services
1	Home Care Service Nepal	homecareservicenepal.com	Care and Domestic Services	9
2	Doorsteps Nepal	doorstepsnepal.com	Multi-Service Marketplace	20
3	Smart Home Sewa	smarthomesewa.com	Technical and Appliance Services	20
4	Repairing Service Nepal	repairingservicenepal.com	Repair and Maintenance	14
5	House Maid Agency Nepal	housemaidagencynepal.com	Domestic Help and Cleaning	21
6	Care Connect Nepal	careconnectnepal.com	Housekeeping and Domestic Care	7

7	Sewa Home Health Care	sewahh.com	Healthcare and Domestic Help	4
8	Kafal Care	kafalcare.com	Preventive Healthcare at Home	4
9	MedEx Nepal	medex.com.np	Medical and Tele-Health Services	8
10	Sajilo Sewa	sajilosewa.com	On-Demand Multi-Service Marketplace	18
11	Birami Kuruwa	biramikuruwa.com	Healthcare and Patient Support	7
12	NepFix	nepfix.com	Technical and Appliance Repair	8
13	Ghar Ghar Sewa	ghargharsewa.com	Multi-Category Home Services	12
14	Doctor House Call Service Nepal	doctorhousecall.com	Healthcare at Home	12
15	Smart Care Nepal	smartcare.com.np	Appliance and Technical Repair	12
16	Home Repair Nepal	homerepairnepal.com	General Home Repair	6
17	Homeplex Nepal	homeplexnepal.com	Construction and Home Improvement	9

18	Technical Sewa	technicalsewa.com	Technical and Appliance Services	15
19	Chito Sewa	chitosewa.com	Multi-Service Platform	10
20	Skill Sewa	skillsewa.com	Construction and Renovation	12
21	Quick Fix Nepal	quickfix.com.np	Repair and Maintenance	9
22	Sipmandu	sipmandu.com	Civil and Technical Works	10
23	Home Plumbing Nepal	homeplumbingnepal.com	Specialist Plumbing Services	8
24	KSM Services	ksmnepal.com	Professional Design and Construction	4
25	Reshape Home	reshapehome.com	Renovation and Home Improvement	7

The chart shows three distinct tiers in the market. At the top, House Maid Agency Nepal (21 services), Doorsteps Nepal (20), and Smart Home Sewa (20) stand out as the most diversified companies, offering roughly five times more services than the smallest companies. A solid middle group exists too, including Sajilo Sewa, Technical Sewa, and Repairing Service Nepal, sitting in the 12 to 18 range. At the bottom, KSM Services, Sewa Home Health Care, and Kafal Care offer just 4 services each, suggesting niche, single-specialty operations rather than full platforms.

Figure 1: Number of Services per Company

6. Service Landscape Analysis

Across all 25 companies, 267 individual services were identified and classified into seven categories. Table 2 shows the distribution, and Figures 2 and 3 provide visual breakdowns.

Table 2: Service Category Distribution

Service Category	No. of Services	Share	Examples
Home Repair	77	28.8%	Plumbing, Carpentry, Waterproofing, Renovation, False Ceiling
Technical Services	76	28.5%	Electrical, AC Servicing, CCTV, Networking, Fire Safety
Cleaning and Maintenance	31	11.6%	Deep Cleaning, Pest Control, Sofa/Carpet Cleaning, Chimney
Care Services	27	10.1%	Housemaid, Elderly Care, Babysitter, Nursing, Maternity Care

Lifestyle and Misc	22	8.2%	Painting, Driver on Hire, Moving, Pet Care, Automobile
Healthcare Services	21	7.9%	Lab Tests, Doctor at Home, IV Therapy, Physiotherapy
Professional Services	13	4.9%	Interior Design, Architecture, Legal Services, Beautician

Home Repair (28.8%) and Technical Services (28.5%) together take up well over half the pie, confirming that the Nepal home services market centers mainly on repair and trade work rather than higher-value or specialized offerings. Cleaning and Maintenance (11.6%) and Care Services (10.1%) form a secondary group, while Lifestyle and Misc (8.2%) and Healthcare Services (7.9%) remain smaller niches. Professional Services sits at the bottom with just 4.9%, showing that architecture, structural design, and project management have barely any presence in the market.

Figure 2: Service Category Distribution

The bar chart backs up the pie chart's findings in raw numbers. Home Repair (77 services) and Technical Services (76) sit almost tied and far ahead of every other category. Cleaning and Maintenance (31) and Care Services (27) come next but trail by a wide margin, while Lifestyle and Misc (22) and Healthcare Services (21) land close together. Professional Services remains the smallest category overall, with only 13 services across all 25 companies, marking the clearest gap in the market for anyone looking to avoid the crowded repair and technical space.

Figure 3: Services per Category

Service-to-Company Mapping

The table below maps each key service to the specific companies that offer it across all 25 providers reviewed. This follows the format requested by the supervisor.

Table 3: Service-to-Company Mapping

Service	Companies Offering in Nepal
Plumbing	Home Care Service Nepal, Smart Home Sewa, Sajilo Sewa, NepFix, Ghar Ghar Sewa, Skill Sewa, Quick Fix Nepal, Home Plumbing Nepal, Homeplex Nepal, Chito Sewa, Sipmandu, Technical Sewa, Reshape Home
Electrical Repairs	Home Care Service Nepal, Smart Home Sewa, Repairing Service Nepal, NepFix, Ghar Ghar Sewa, Sajilo Sewa, Sipmandu, Smart Care Nepal, Technical Sewa, Chito Sewa, Home Repair Nepal, Homeplex Nepal, Quick Fix Nepal

AC Servicing	Smart Home Sewa, Repairing Service Nepal, NepFix, Sajilo Sewa, Quick Fix Nepal, Smart Care Nepal, Technical Sewa, Chito Sewa
Deep Cleaning	House Maid Agency Nepal, Care Connect Nepal, Sewa Home Health Care, Sajilo Sewa, NepFix, Ghar Ghar Sewa, Smart Care Nepal, Technical Sewa
Carpentry	Smart Home Sewa, Repairing Service Nepal, Homeplex Nepal, Smart Care Nepal, Quick Fix Nepal, Technical Sewa, Skill Sewa
Painting	Smart Home Sewa, Repairing Service Nepal, House Maid Agency Nepal, Ghar Ghar Sewa, Quick Fix Nepal, Skill Sewa, Reshape Home, Home Repair Nepal, Homeplex Nepal
Washing Machine Repair	Sajilo Sewa, Smart Home Sewa, Smart Care Nepal, Technical Sewa
Handyman Repair	Repairing Service Nepal, NepFix, Sajilo Sewa, Smart Home Sewa, Quick Fix Nepal
Housekeeping and Housemaid	Home Care Service Nepal, House Maid Agency Nepal, Care Connect Nepal, Sewa Home Health Care, Doorsteps Nepal, Sajilo Sewa, Ghar Ghar Sewa
CCTV and Smart Security	Smart Home Sewa, Repairing Service Nepal, NepFix, Home Repair Nepal, Smart Care Nepal, Technical Sewa, Sipmandu, Quick Fix Nepal
Elderly and Senior Care	Home Care Service Nepal, House Maid Agency Nepal, Sewa Home Health Care, Doorsteps Nepal, Birami Kuruwa, Doctor House Call Service Nepal
Healthcare at Home	Kafal Care, MedEx Nepal, Birami Kuruwa, Doctor House Call Service Nepal, Chito Sewa
Flooring Fixes	House Maid Agency Nepal (polishing), Sipmandu, Reshape Home, Quick Fix Nepal
Smart Home Setup	Smart Home Sewa (partial), NepFix (CCTV only), Sipmandu (partial)

Moving Services	Technical Sewa (Packers and Movers), Smart Home Sewa (Transportation)
EV Charger Installation	Doorsteps Nepal only
Airbnb Maintenance	Not offered by any of the 25 companies
Pressure Washing	Not offered by any of the 25 companies

Table 4: Market Distribution - Service Frequency Analysis

Availability Level	Service Examples	Market Implication
Highly Common (6+ companies)	Plumbing, Electrical Repairs, Housekeeping, Painting, Deep Cleaning	High competition; quality and pricing transparency are key differentiators
Moderately Available (3-5 companies)	AC Servicing, CCTV, Carpentry, Elderly Care, Pest Control, Nursing	Growing demand; entry possible with a quality edge
Rare or Niche (1-2 companies)	EV Charger Installation, Smart Home Automation, Moving Services, Drone Repair	Low competition; good opportunity for new entrants
Absent (0 companies)	Pressure Washing, Airbnb Maintenance	Zero competition; clearest and most immediate market gap

7. Competitive Landscape Analysis

The heatmap shows that most companies pick a lane rather than spreading evenly across categories. Doorsteps Nepal holds 12 services in Home Repair, House Maid Agency Nepal holds 12 in Cleaning and Maintenance, Smart Home Sewa holds 10 in Technical Services, and Sajilo Sewa holds 10 in Home Repair as well. Some companies focus almost entirely on a single category, like Home Plumbing Nepal concentrating fully on Technical Services, or Care Connect Nepal staying entirely within Cleaning and Maintenance. Only a few companies, such as Ghar Ghar Sewa and Chito Sewa, spread offerings across four or five categories, making true generalist positioning rare across the market.

Figure 4: Company vs. Service Category Heatmap

The stacked bar chart confirms the specialization pattern from the heatmap while also showing total scale. Doorsteps Nepal and House Maid Agency Nepal reach large totals mainly through one dominant category each, Home Repair and Cleaning and Maintenance respectively. Smart Home Sewa and Technical Sewa lean heavily into Technical Services as well. Meanwhile, Skill Sewa and Ghar Ghar Sewa show more balanced, multi-colored bars, reflecting a genuinely mixed service portfolio rather than reliance on one category. Overall, scale in the market tends to come from depth in one category rather than even spread across all seven.

Figure 5: Service Category Breakdown per Company

Strongest Players

- House Maid Agency Nepal: 21 services, strongest in Cleaning and Maintenance (12), spans 5 of 7 categories.
- Smart Home Sewa: 20 services, deepest Technical Services bench (10), reports 94,000+ satisfied clients.
- Doorsteps Nepal: 20 services, strongest in Home Repair (12) and Care Services (7), operates as an aggregator marketplace.
- Technical Sewa: 15 services, strong across technical appliance repair including drone and medical equipment repair.
- Sajilo Sewa: 18 services, structured online booking marketplace.
- Repairing Service Nepal: 14 services, focused on repair and maintenance.

Differentiation Strategies

- Certification and trust: Home Care Service Nepal promotes CTEVT-certified staff as a quality signal.
- Healthcare specialization: Kafal Care, Birami Kuruwa, MedEx Nepal, and Doctor House Call Service Nepal dominate healthcare-at-home as a distinct niche.
- Marketplace model: Sajilo Sewa and Doorsteps Nepal operate as aggregators rather than direct service providers.
- Annual Maintenance Contracts: Smart Home Sewa and Sajilo Sewa offer AMC packages for customer retention.
- Professional services: Ghar Ghar Sewa (accountants, lawyers), Skill Sewa (engineering, interior design), and KSM Services (architecture, project management) are the only players in this largely uncontested space.
- Construction-first: Skill Sewa, Homeplex Nepal, Sipmandu, and KSM Services focus on civil works and renovation.

Weak Areas Across Competitors

- Most platforms lack a mobile application for booking or tracking.
- Pricing transparency is poor; very few companies list fixed prices publicly.

- Customer review systems are minimal or missing on most websites
- Geographic reach is mostly confined to Kathmandu.
- Average category coverage is only 3.1 of 7 categories per company (44%).
- No platform combines Healthcare, Technical, and Care services with transparent pricing and real-time tracking.

8. Pricing Analysis and E-Commerce Readiness

This section examines how the 25 companies display pricing and whether any operate as true e-commerce platforms, where a customer can select a service, see a price, and pay online without contacting a human. Each company website, app store listing, and booking flow was reviewed directly to determine (1) pricing visibility and (2) e-commerce capability.

Classification Criteria

Two separate dimensions were assessed for each company:

Pricing Visibility

- Fixed/Published Pricing: exact prices (NPR figures) are listed publicly for at least some services
- Indicative/Range Pricing: “starting from” prices or rough cost guidance is published
- Quote-Only: pricing is provided only after a call, WhatsApp message, or technician visit
- No Pricing Information: no cost guidance of any kind is available

E-Commerce Capability

- True E-Commerce: customers can browse, select, and pay online before service delivery, with no human contact required to complete the transaction
- Online Booking, Pay Later: customers can book or schedule online or via an app, but payment is completed after service delivery (cash, bank transfer, or digital wallet)
- Lead Generation Only: booking form only triggers a callback, with no scheduling or pricing engine
- Phone or WhatsApp Only: no website or app-based booking system is available

Pricing and E-Commerce Summary Table

Table 5: Pricing and E-Commerce Summary

Company	Pricing Visibility	Payment Method	E-Commerce Status
Home Care Service Nepal	Quote-only	Pay on completion	Booking Form or Phone Inquiry Only
Door Steps Nepal	Quote-only	Pay on completion	Online Booking Pay After Service
Smart Home Sewa	Quote-only	Pay on completion	Online Shop with Product Categories
Repairing Service Nepal	Quote-only	Pay on completion	Quote on Inquiry Only
House Maid Agency Nepal	Fixed/Published	Cash, in person	Booking Form or Phone Inquiry Only
Care Connect Nepal	Quote-only	Pay on completion	Booking Form or Phone Inquiry Only
Sewa Home Health Care	No pricing information found	Not stated	Contact Form or Phone Inquiry Only
Kafal Care	Quote-only	Not stated	App Based Booking with Fixed Pricing
MedEx Nepal	Fixed/Published	Online payment, multiple channels, home delivery	Online Booking Pay After Service
Sajilo Sewa	Fixed/Published	Cash, bank transfer, mobile wallet	Full Online Cart and Payment
Birami Kuruwa	No pricing information found	Not stated	Booking Form or Phone Inquiry Only

NepFix	Fixed/Published	Not stated	Listed Prices with Online Booking
Ghar Ghar Sewa	Quote-only	Not stated	Directory Listing Only
Doctor House Call Service Nepal	No pricing information found	Not stated	Phone Call Booking Only
Smart Care Nepal	Quote-only	Not stated	Online Booking Pay After Service
Home Repair Nepal	No pricing information found	Not stated	Contact Form or Phone Inquiry Only
Homeplex Nepal	No pricing information found	Not stated	Contact Form or Phone Inquiry Only
Technical Sewa	Quote-only	Cash on delivery or online, post-service	Online Booking Pay After Service
Chito Sewa	Dynamic/Published per listing	Not confirmed online; appears finalized at completion	Booking Form or Phone Inquiry Only
Skill Sewa	Quote-only	Not stated	Consultation on Inquiry Only
Quick Fix Nepal	No pricing information found	Not stated	Online Booking Pay After Service
Sipmandu	No pricing information found	Not stated	Quote on Inquiry Only
Home Plumbing Nepal	No pricing information found	Not stated	Quote on Inquiry Only

KSM Services	Quote-only	Milestone payments, offline	Consultation on Inquiry Only
Reshape Home	Quote-only	Pay on completion	Quote on Inquiry Only

Market Implication for Tackles Pro

Table 6: E-Commerce Tier Distribution Across the Nepal Market

Tier	E-commerce Status	Companies	Share of Market
Full Online Cart and Payment	Full Online Cart and Payment	Sajilo Sewa	4%
Digital Pricing or Storefront Model	Online Shop with Product Categories, App Based Booking with Fixed Pricing, Listed Prices with Online Booking	Smart Home Sewa, Kafal Care, NepFix	12%
Online Booking, Pay After Service	Online Booking Pay After Service	Doorsteps Nepal, MedEx Nepal, Smart Care Nepal, Technical Sewa, Quick Fix Nepal	20%
Manual or Offline Inquiry Models	Booking Form or Phone Inquiry Only, Contact Form or Phone Inquiry Only, Quote on Inquiry Only, Consultation	Home Care Service Nepal, House Maid Agency Nepal, Care Connect Nepal, Birami Kuruwa, Chito Sewa, Sewa Home Health Care, Home Repair Nepal, Homeplex Nepal, Repairing Service Nepal, Sipmandu, Home	64%

	on Inquiry Only, Directory Listing Only, Phone Call Booking Only	Plumbing Nepal, Reshape Home, Skill Sewa, KSM Services, Ghar Ghar Sewa, Doctor House Call Service Nepal	
--	---	--	--

A platform combining fixed, published prices with a genuine full online cart and payment experience in the Home Repair and Technical Services categories currently has no direct match in the Nepal market. Sajilo Sewa comes closest to this model, but it functions as a broad multi-category marketplace rather than a focused, transparent home services platform. For Tackles Pro, this gap represents a clear and largely unclaimed positioning opportunity.

The chart shows that 80 percent of these 25 companies hide their pricing in some way, either with no pricing info at all or a "quote only" setup that mostly means calling or messaging to ask, and only a handful publish fixed prices you can see upfront. The companies that do publish pricing are also the same ones with real online carts or storefronts, so transparency and digital checkout seem to go together, while almost everyone else is stuck doing things the old fashioned way. Since only one company combines clear pricing with full online checkout, that is a clear gap, and it backs up the pricing transparency idea already in the Tackles Pro opportunity analysis.

Figure 6: Pricing vs E-Commerce Tier Across Home Services Companies

9. Gap Analysis vs. Tackles Pro

Tackles Pro is a professional handyman and home maintenance platform offering plumbing, electrical repair, AC servicing, painting, deep cleaning, EV charger installation, smart home setup, and Airbnb maintenance. It is designed as a multi-service solution that combines repair, installation, and property maintenance under one unified platform. Table 7 compares Tackles Pro's service coverage against all 25 Nepal-based companies reviewed, highlighting gaps in existing offerings and areas where Tackles Pro provides broader and more integrated coverage.

Table 7: Gap Analysis - Tackles Pro vs. Nepal Market (25 Companies)

Tackles Pro Service	Availability in Nepal	Notes
Plumbing	Fully Available	13+ providers; quality differentiation needed
Electrical Repairs	Fully Available	13+ providers; widely offered
AC Servicing	Fully Available	8 providers; growing demand
Deep Cleaning	Fully Available	8 providers; multiple specialists exist
Carpentry	Fully Available	7 providers
Painting	Fully Available	9 providers
Washing Machine Repair	Fully Available	Sajilo Sewa, Smart Home Sewa, Smart Care Nepal, Technical Sewa
Handyman Repair	Fully Available	Most providers offer general handyman services
Flooring Fixes	Partially Available	Marble polishing exists; full flooring limited
Smart Home Setup	Partially Available	CCTV offered widely; full automation absent
Moving Services	Partially Available	Transportation by 2 providers; not structured as moving service

EV Charger Installation	Rare - 1 Provider	Doorsteps Nepal only; major gap
Airbnb Maintenance	Not Available	No provider found across all 25 companies
Pressure Washing	Not Available	No provider found across all 25 companies

The chart works as a useful gap map for the market. Plumbing, Electrical Repairs, AC Servicing, Deep Cleaning, Carpentry, Painting, and appliance repair all appear in green, meaning full availability already exists across the market. Competing in those areas would come down to price, speed, or trust rather than offering something new. Flooring Fixes, Smart Home Setup, Moving Services, and EV Charger Installation fall into the orange or yellow zone, showing partial coverage. The standout finding remains Pressure Washing and Airbnb Maintenance, both marked red and essentially absent from the Nepal market, making both strong candidates for first-mover advantage given the growth of short-term rentals in Kathmandu.

Figure 7: Tackles Pro Services - Availability in Nepal Market

10. Perspective Opportunities and Business Verticals

Based on the analysis of 25 companies, 267 services, and pricing structures across the market, the following business verticals represent the strongest penetration opportunities in the Nepal home services market, ranked by opportunity size and competitive intensity.

A. Pressure Washing and Airbnb Maintenance (Highest Priority)

No company among the 25 reviewed offers these services. With growing tourism and short-term rentals in Nepal, demand for turnover cleaning and property maintenance will increase. Tackles Pro can enter this space with no direct competition.

B. EV Charger Installation and EV Ecosystem Services

Only Doorsteps Nepal offers EV charger installation. Technical Sewa provides EV repair but not installation. With accelerating EV adoption in Kathmandu, this remains a high-growth and underserved vertical. Early entry would position Tackles Pro as the default EV services provider.

C. Smart Home Automation and Integration

Several companies offer CCTV installation, but full smart home setup including smart lighting, automated locks, smart appliances, and integrated control systems is largely absent. This represents a premium service vertical with minimal direct competition.

D. Standardized Multi-Service Platform with Transparent Pricing

Across all 25 competitors, the key gap is the absence of fixed, publicly listed pricing. Most rely on quotes or inquiries, leading to low transparency. A standardized platform with visible pricing and online booking would strongly differentiate the market.

E. Subscription-Based Home Maintenance Plans

Although Smart Home Sewa and Sajilo Sewa offer AMC packages, subscription-based models are still rare. Structured monthly or annual plans for plumbing, electrical, and AC maintenance present a strong opportunity for predictable revenue.

F. Professional Services Vertical

With only 13 professional service listings compared to 77 in home repair, this remains the largest underdeveloped segment. Few players actively operate here, leaving room for bundled service offerings under a single platform.

G. Corporate and Institutional Contracts

None of the 25 companies appear to focus on B2B service contracts for offices, hospitals, or hotels at scale. Packaged service agreements for corporate clients would create stable revenue streams and differentiate from purely consumer-facing competitors.

Technology and Platform Improvements

- Develop a mobile application with real-time tracking, digital payments, and instant booking
- Implement transparent, fixed pricing across services (major market gap identified in pricing analysis)
- Introduce verified ratings and review systems to improve trust
- Integrate WhatsApp Business API for booking and support
- Use AI-based scheduling and technician matching for efficiency

Geographic Expansion

- Establish Kathmandu as the primary market first.
- Target Pokhara as the second city due to high tourism and growing middle-class demand.
- Expand to Biratnagar and Lalitpur as third-phase markets.

11. Key Findings

- The Nepal home service market is highly fragmented; expanding to 25 companies confirms no single platform dominates across all seven categories.
- The 11 newly identified companies significantly intensify competition in Home Repair and Technical Services; both now have 13+ providers with overlapping offerings.

- Plumbing and electrical services are the most saturated, with quality and pricing transparency being the only viable differentiators.
- Professional Services (4.9%) and the completely absent Pressure Washing and Airbnb Maintenance represent the largest whitespace opportunities.
- Healthcare-at-home is a distinct and growing niche led by Kafal Care, MedEx Nepal, Doctor House Call Service Nepal, and Birami Kuruwa, and remains separate from general home service platforms.
- The marketplace model is beginning to emerge through Sajilo Sewa and Doorsteps Nepal, suggesting a shift toward platform-based aggregation.
- Digital maturity remains low-to-moderate; only 2 to 3 companies have structured online booking and virtually none have a mobile application.
- Average category coverage per company is 3.1 of 7 (44%); even the broadest players cover only 5 of 7 categories.
- Pricing transparency is the exception, not the rule. Roughly 80% of the 25 companies are quote-only or display no pricing information at all, requiring a phone call, WhatsApp message, or in-person visit before a customer learns the cost of a service.
- Only one true e-commerce platform exists in the market, MedEx Nepal, via its MedEx Mart storefront, and it operates in the pharmacy/medical products vertical, not home repair or care services.
- A small second tier of companies (Sajilo Sewa, NepFix, Chito Sewa, House Maid Agency Nepal) publish fixed prices on their websites but still settle payment offline after the job is done, meaning even Nepal's most transparent home service providers stop short of full e-commerce.
- No competitor combines published, fixed pricing with online prepayment specifically in Home Repair, Technical Services, or Care Services, which are Tackles Pro's core categories, confirming a clear, unclaimed positioning gap alongside the service-level whitespace already identified (Pressure Washing, Airbnb Maintenance, EV Charger Installation).

12. Conclusion

The on-demand home services market in Kathmandu, Nepal, is an emerging and fast-growing sector with strong untapped potential. An analysis of 25 active companies identified 267 individual services across seven major categories. Home Repair and Technical Services dominate the market, accounting for 57.3% of all offerings, which reflects strong and consistent demand for maintenance, repair, and installation services. However, this heavy concentration has also led to intense competition in these areas, while several other categories remain relatively underdeveloped. Professional Services, for example, make up only 4.9% of the total services, making it the least explored segment in the market.

The market also reveals several underserved and emerging service opportunities. EV Charger Installation, Airbnb Maintenance, Pressure Washing, and Smart Home Automation are either offered by only a single provider or are completely absent across most companies. At the same time, the overall digital maturity of the industry remains low. Most companies still depend on phone calls and WhatsApp for bookings, with limited use of mobile applications, real-time tracking, or transparent pricing systems. These gaps indicate that customer expectations are not being fully met, especially in terms of convenience, reliability, and service transparency.

The competitive landscape is highly fragmented, with companies covering an average of only 3.1 out of the seven service categories. No single provider offers an integrated solution that combines technical, care, and healthcare-related services under one platform. While companies such as House Maid Agency Nepal, Smart Home Sewa, and Doorsteps Nepal perform strongly within specific niches, none provide a complete end-to-end home services ecosystem. For Tackles Pro, this creates a clear opportunity to enter the market by targeting underserved services while improving user experience through digital booking, transparent pricing, and verified professionals, positioning itself as a more organized and technology-driven alternative in Nepal's home services industry.
